INFOSHIP CALL

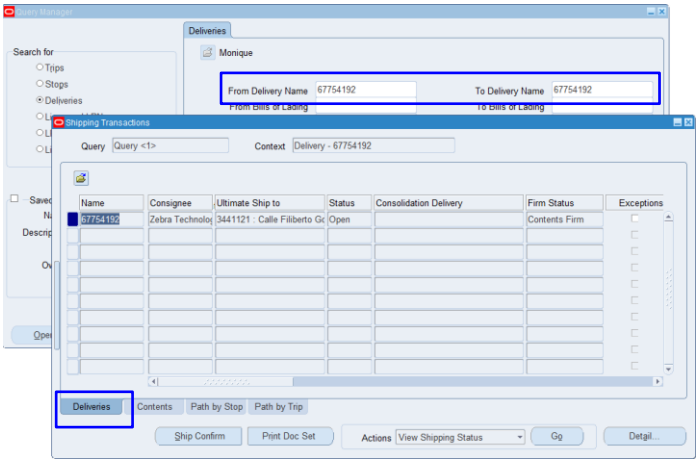
Once the shipment is ready to be shipped the 'Infoship Shipment Call' can be done. The Infoship Call ensures that the correct carrier is assigned to the Delivery, that the waybill number is generated and that the carrier labels are printed.

Please note: If you are using Infoship for the first time you need to set up the Infoship Printer first (instructions at the bottom)

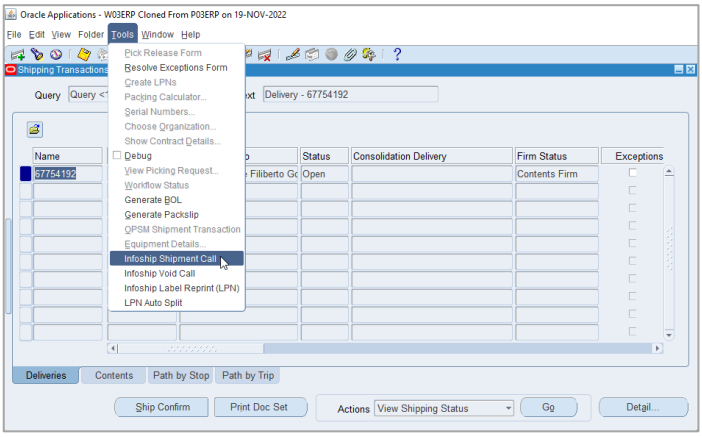
Step 1: Using the Oracle Forms, navigate to the 'Shipping Transactions' Form

Step 2: Select the 'Deliveries' radio button

Enter the Delivery number in the 'From Delivery Name' and 'To Delivery Name' fields

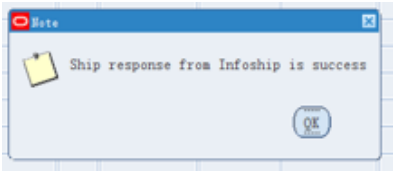


Step 3: Make sure you are on the 'Deliveries' Tab
Go to 'Tools' -> 'Infoship Shipment Call'



Step 4: The Delivery will now be processed by Infoship**.**

You will see the following message when the Infoship Call was successful
The Carrier details on the delivery have now been updated, the Waybill Number is added and the carrier labels will have been printed



Please check with the Logistics/Transportation Team in case you see an error message for the Infoship Call that you cannot resolve yourself.

The Delivery is now ready to be shipped and to be 'Ship Confirmed' in Oracle.

Infoship Printer set up:
Go to 'Edit' -> 'Preferences' -> 'Profiles'.
Query Profile Name 'ZBR_INFOSHIP_PRINTER_OVERRIDE' and enter the label printer name in the 'User Value' field
