PTO DELIVERY – COUNTRY OF ORIGIN VALIDATION

Before the actual kitting process is started, it is important to check the Country of Origin details for the Kit assembly (parent) item as well as the individual Kit components.

The Country of Origin details are printed on the PTO Kit Sheet, which is part of the Pack Consolidation Report

COO Parent Item	COO Component Items	Example	Action required
Single-sourced	All single-sourced		No
Multi-sourced 'XX'	All single-sourced		No
Blank	All single-sourced		No action required for the PO kitting activities However, it is good to alert your Supervisor, so that he/she can ask the GTCO Team to update the master data for the Kit parent item
Multi-sourced 'XX'	At least 1 component is Multi-sourced 'XX'		Country of Origin Details must be updated in the Delivery line details. Please refer 'WI - Outbound - Updating COO v1.0. docx'
Single-sourced	At least 1 component is Multi-sourced 'XX' (not the main component)		Country of Origin Details must be updated in the Delivery line details. Please refer 'WI - Outbound - Updating COO v1.0.docx'

The Country of Origin details are validated and updated where necessary, ready for the PTO Kit Creation Process.
