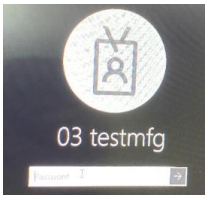
1. OVERVIEW

This work instruction provides instructions on how to create Serial labels using the Zebra system zDSS.

2. CREATE SERIAL LABEL

1. Log into Zebra- zDSS system.

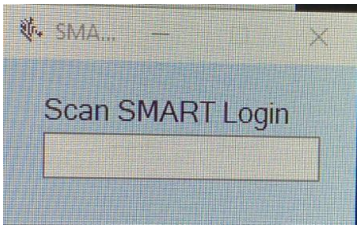


2. Scan the password that is displayed on the monitor (Welcomezebra2).

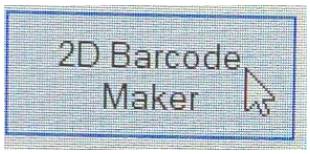
✓ The password changes yearly.

3. Click on zDSS shortcut.

4. In Scan SMART Login, scan the password also display on the monitor (03testmfg).



5. Click on 2D Barcode Maker.



✓ The Printer IP will auto-populate.

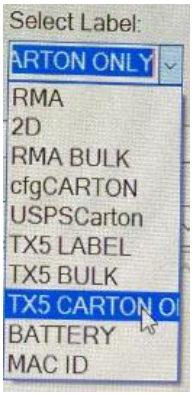
This document contains proprietary information which is the exclusive property of Zebra Technologies Corp.

The most recent version of this document is located on the ISO Library.
Verify revision number before use.

✓ If it does not auto-populate enter the IP number on the printer.

Ex:

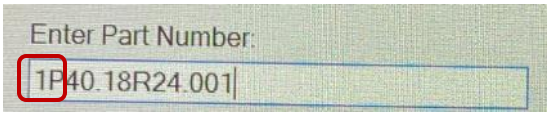
6. In the Select Label field drop-down menu, select TX5 Carton.



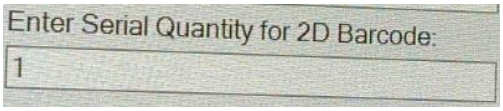
7. In the Delivery field, enter a generic delivery number.

8. In the Part Number field, enter the SKU number

✓ Remove any extra digits that auto-populate when the Part # is scanned such as (1P).



9. Serial Quantity for 2D barcode field, enter the # of serial(s) that will be on the label.



✓ Max Serial Quantity is 14.

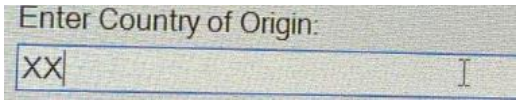
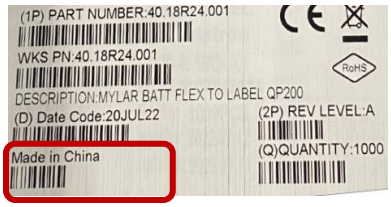
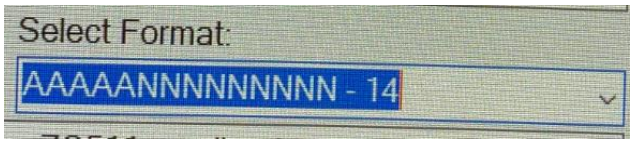
10. Enter the COO - Country of Origin.





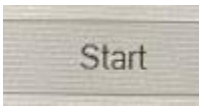
- ✓ COO abbreviations are in Section 3.
- ✓ **Country of Origin cannot be XX.**

11. In the Select Format field, from the drop-down menu select the format for the serial # you need.

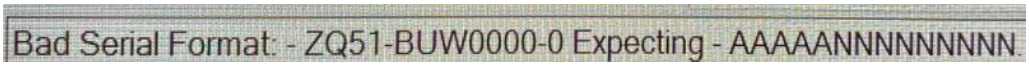


- ✓ A is for the letters on the serial #
- ✓ N is for the numbers on the serial #.
- ✓ The number after the dash is for the # of characters.

. 12. Click Start



- ✓ If the part number is scanned instead of the serial # that system will display a Bad Serial # Format error.
- ✓ If the same serial # is scanned the system will not record it and the label will not print.



13. Scan the Serial #(s).

14. The Label Auto prints

15. If you have more serial #s of the same format, click Yes at the pop-up.
