1. OVERVIEW

This work instruction provides directions on how to visually identify packaging that is damaged and can be repaired on-site or rebox.

2. CATEGORIES

1. Acceptable: No Action Necessary

The product and its packaging are in original condition which is what every customer really wants. It can be shipped without repair or remediation necessary.

2. Acceptable: Minor Damage - Repair in Warehouse Necessary

The product probably has not become damaged, and the amount of packaging damage would not likely result in customer concern. The package integrity is such that it can continue to protect the product in shipment to the final customer.

3. Unacceptable: Significant Damage - Repackaging and/or Inspection of Product Necessary

The package cannot be trusted to continue to protect the product during distribution or may cause damage to other products.

- ✓ When in doubt about which category something belongs in - interpret the problem at the next (lower on this list) condition of damage since further shipment will likely only increase the amount of physical damage.
- ✓ Secondly, put yourself in the shoes of the customer. Would you accept it?
- ✓ If you continue to observe consistently repeated incidences of a particular type of damage please inform management.

3. ACCEPTABLE

CUSTOMERS EXPECT THIS!
There is no physical damage. Labels are accurate and legible, with no scuffing, crushing, tears, or punctures. Stacks are neat and vertical with no overhang or broken pallets.

Minor Dented corner <20mm depth (Minor)

The corner on this outer box has been dented; however, the dent is minor.

Minor Creases in box material due to impact or compression <10mm depth (Minor)

4. ACCEPTABLE AND REPAIR ON SITE

Acceptable: - Repair Necessary Abrasions or Torn liner of < 75mm in diameter/length (Non-penetrating) The exterior of the liner has been torn, however, not a complete hole. If this occurs, cover up the tear with brown kraft tape. not to obscure any pertinent markings on the carton.

Overpacked Products
The exterior (shipping) box has been torn, however, the saleable products within seem fine.

Verify revision number before use.

If this occurs, cover up the tear with brown kraft tape or discard the outer box and place the individual unit-level products packages in inventory.

5. UNACCEPTABLE DAMAGE

Inspect Products and Repackage
This item has endured extreme compression and punctures, package integrity has been compromised, and the products inside may be damaged. Product inspection is highly recommended.
