PO RECEIPT

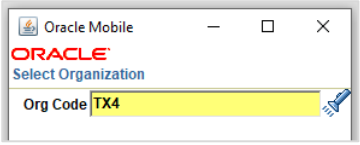
PO Receipts can be used for any shipments from external Suppliers that do not have an ASN.

Usually the ASN receipt is attempted first, if this gives an error 'Pls do PO Receipt' then this menu-option must be used.

For these shipments the LPN and Serial Number data must be scanned at receipt using the 2D barcodes on the cartons.

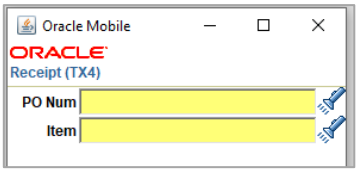
Step 1: Using the Mobile Application, navigate to 'Inbound'-> 'Std Receive (NALA)' -> 'PO COO (single SN)'

Step 2: Enter the correct Organization and press 'Enter' on the keypad



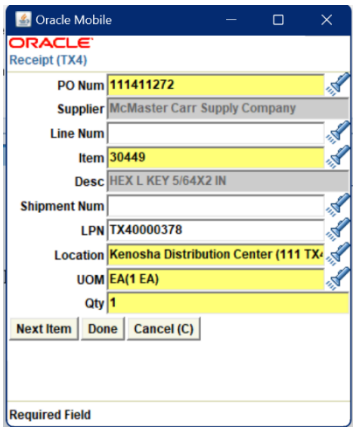
Step 3: In the PO field, scan or enter the PO number and press 'Enter'

In the 'Item field' you can immediately scan a 2D barcode on the material. After this scan, the system will automatically populate the item field and the Country of Origin and the cursor will go to the 'LPN' field.



Verify the Item, Country of Origin, location and UOM information displayed

Step 4: Scan a new (pre-generated) LPN into the LPN field

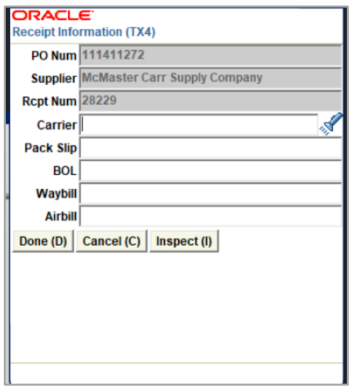


Step 5: Enter the quantity of the item being received

Note: In case of an over-receipt, notify the Inventory Control team.

<u>Items with Serial Numbers:</u>
Scan all the 2D barcodes on the cartons for the item being received. The first scanned 2D barcode in Step 4 will automatically be used, so there is no need to scan this again. The 'Remaining' quantity will show how many Serial Numbers still need to be scanned. Continue scanning the 2D barcodes until the total quantity is reached.

Step 6: It is recommended to receive each LPN (pallet) individually, so to select 'Done' after receipt of each LPN. Then repeat steps 3-5
However, it is also possible to receive additional LPNs/items on the same PO by selecting the 'Next Item' button



Step 7: When all items have been entered select the 'Done' button

Select 'Done' again or you can enter other information such as the Pack Slip number first.

Please note the Receipt number – this can be recorded on the Supplier Pack Slip

A 'Please Wait' message will be displayed at the bottom of the screen until the transaction is completed.

The materials received now show as ‘In Receiving’.
