1. OVERVIEW

This work instruction provides directions on how to process Air shipments using the DGIS system to generate the Shippers Declarations document.

2. PREPARING SHIPPERS' DECLARATIONS

1. Log into DGIS website - https://www.dgis.com/app/login.aspx?logout=true

   ✓ Only one person with the same username can access the DGIS system.

   Username – Mark Richards
   Username - Na'quan Singleton
   Temporary password – **Zebra1** (Upper Case Z)

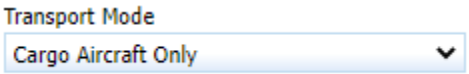
2. Select the Shipping Papers tab.

3. In the Shipping tab, select the appropriate carrier template.

4. Carrier will auto-populate based on template selection or select from the drop-down menu to change the carrier.

   ✓ If the carrier is unavailable, add by clicking Add Carrier.

5. In the Transport Mode field, select Cargo Aircraft Only (COA) from the drop-down menu.

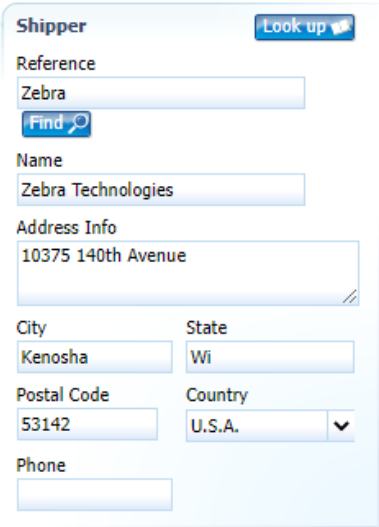


6. Under Shipper, click on Look Up. The address book will appear. Go to the filter field enter Zebra and click apply. The address will appear and select. *If there is only one address listed no need to filter*.

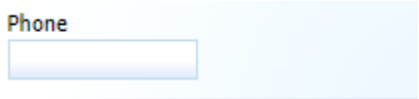
This document contains proprietary information which is the exclusive property of Zebra Technologies Corp.

The most recent version of this document is located on the ISO Library.
Verify revision number before use.

7. Shipper fields will auto-populate.

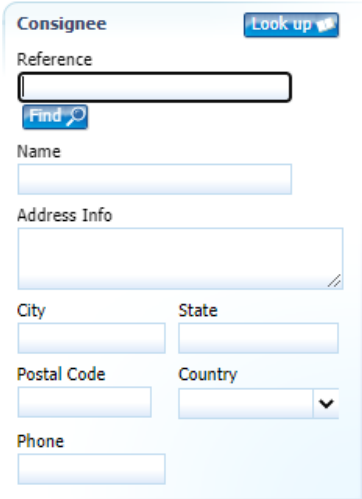


8. Enter the shipper's phone number if available.



9. Under Consignee in the Reference field manually enter the TO: information from the Packing List or Invoice as it appears.

- Name
- Address Info
- City
- State
- Postal Code
- Country (Select from drop-down menu)
- Phone number if available



10. Under the Shippers Reference field, enter the Delivery number.

This document contains proprietary information which is the exclusive property of Zebra Technologies Corp.

The most recent version of this document is located on the ISO Library.
Verify revision number before use.

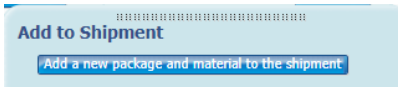
11. In the Air Waybill field, enter the tracking # from the shipping label.

12. Verify the emergency contact is populated as CHEMTREC and the phone # +1-800-424-9300

13. In the Signatory fields enter the processor's information.

14. Under Actions: Select Add Material Tab

15. In the Add to Shipment pop-up, click Add a new package & material to the shipment.



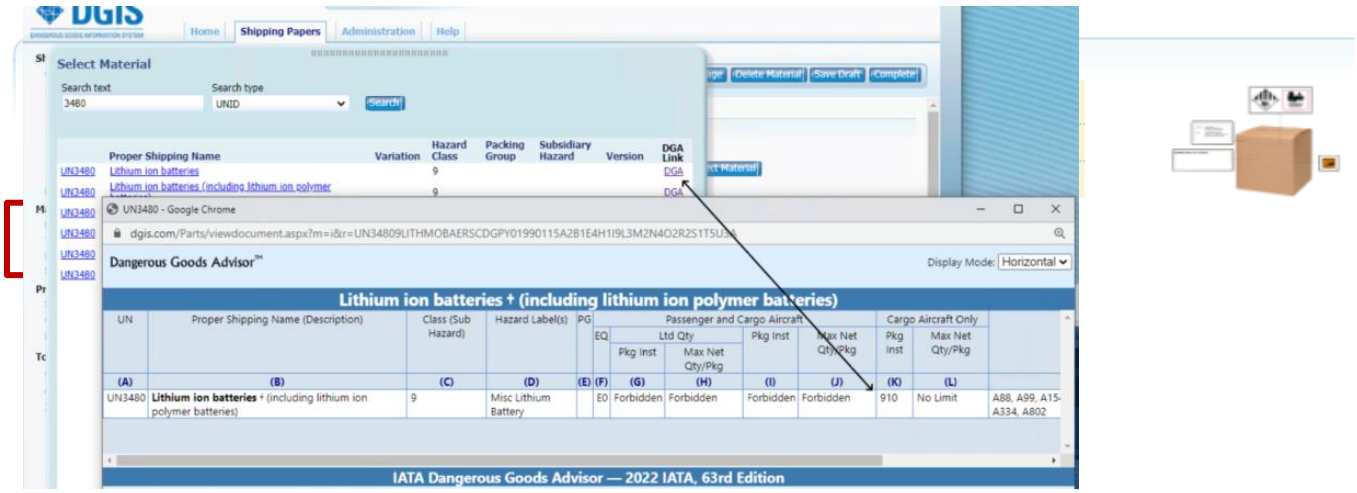
16. Enter UN # and click Search.

✓ UN3480 – Lithium Ion, UN3481 for Section I or UN3090 – Lithium Metal

17. Select the hyperlink applicable to your shipment. Click on the DGA hyperlink to view the Packaging Instructions.

- ✓ Packaging Instructions for Lithium–Ion (965), LI in Equipment Section I (967) & Lithium Metal (968).

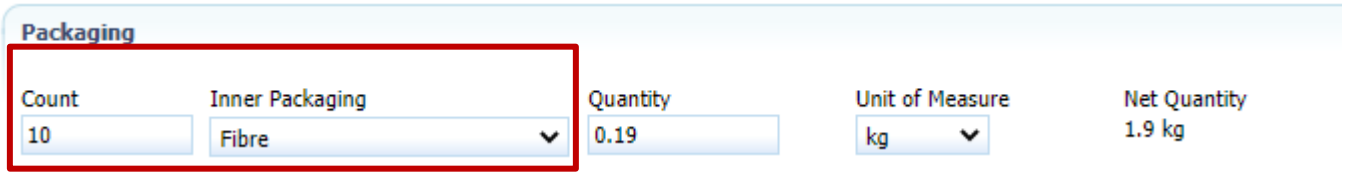
18. Under Packaging Instructions, Cargo Aircraft Only is auto-selected. Use the picture as a label placement reference. ***For further assistance on the weight limits for CAO, please refer to Section 5 of this work instruction***.



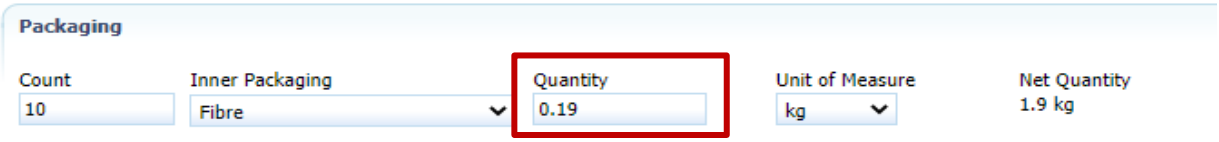
19. Under the PI Section, select the correct Packaging Instruction.

- ✓ Most of Zebra's batteries will fall under (IB), but we have a few under Section (IA)

20. In the first Count field, enter the # of batteries in the box (*not the ordered qty*) and select the type of Inner Packaging.



21. In the Quantity field, enter the net weight in KG of a single/individual battery as it appears on the Invoice and/or Packing List; if no weight is listed, either weigh the battery (without packaging) or look up the weight in Oracle.



22. Set the Unit of Measure to kg.

- ✓ If the Net Quantity is rounding off, use that weight to create the shipper/Consignee label.
- ✓ Please remember the weight on the shippers' declarations; the shipper/consignee label and the commercial invoice, if one is present, MUST be an exact match.

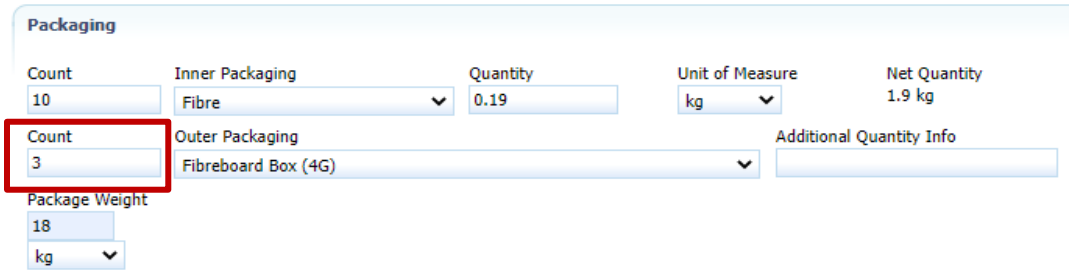
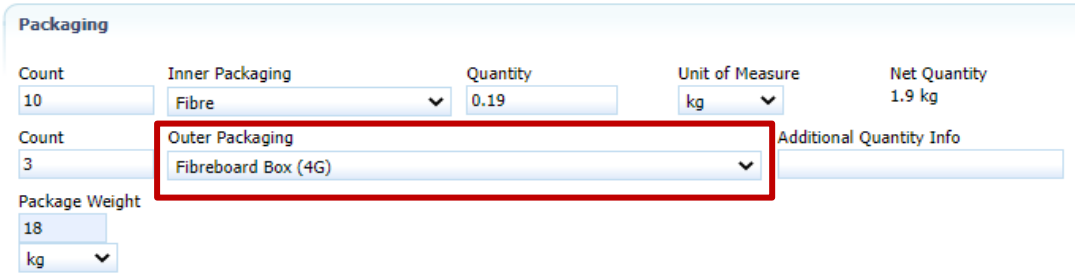
The most recent version of this document is located on the ISO Library.
Verify revision number before use.

23. In the 2nd Count field, next to Outer Packaging, enter the # of cases.

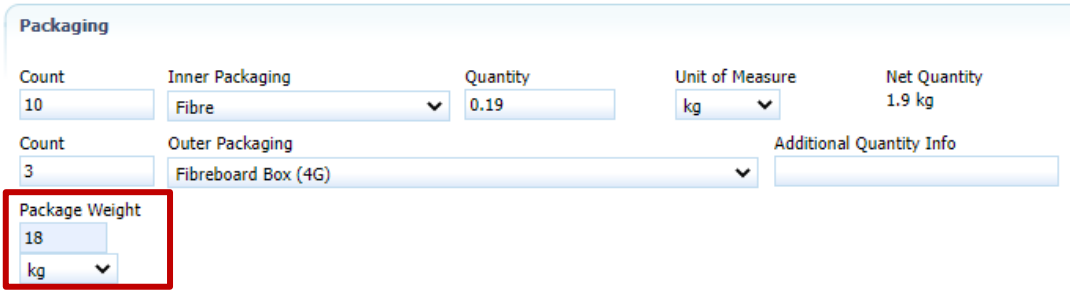


24. Under Outer Packaging, select Fibreboard box from the drop-down menu.

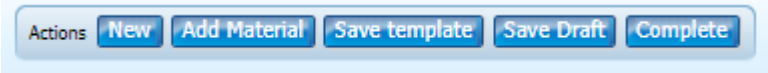


25. In the Package Weight field, enter the Gross Package Weight written on the PCR.

✓ Ensure weight is entered in kg.



26. Under Actions: Click Complete



✓ If there are more packages to add with different quantity and/or weight details, follow steps 14-30.

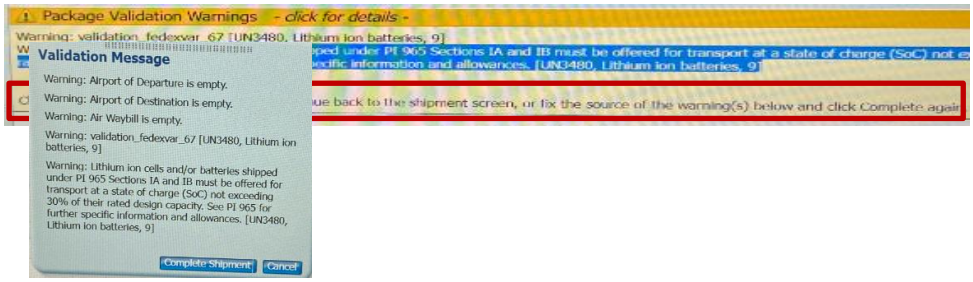
27. A Validation Warning will appear. Click on the warning to display details.

This document contains proprietary information which is the exclusive property of Zebra Technologies Corp.

The most recent version of this document is located on the ISO Library.
Verify revision number before use.

28. Click on Warning Msg to acknowledge the msg.

29. Under Actions, click Complete.

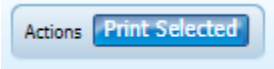


30. In the Validation Message pop-up, click Complete Shipment.

3. PRINTING SHIPPERS' DECLARATION

1. Under the Shipping Papers tab, Current Shipments section select the shipment you prepared.
   ✓ Verify the Reference number to confirm you have the correct shipment.

2. Under Actions, click Print Selected

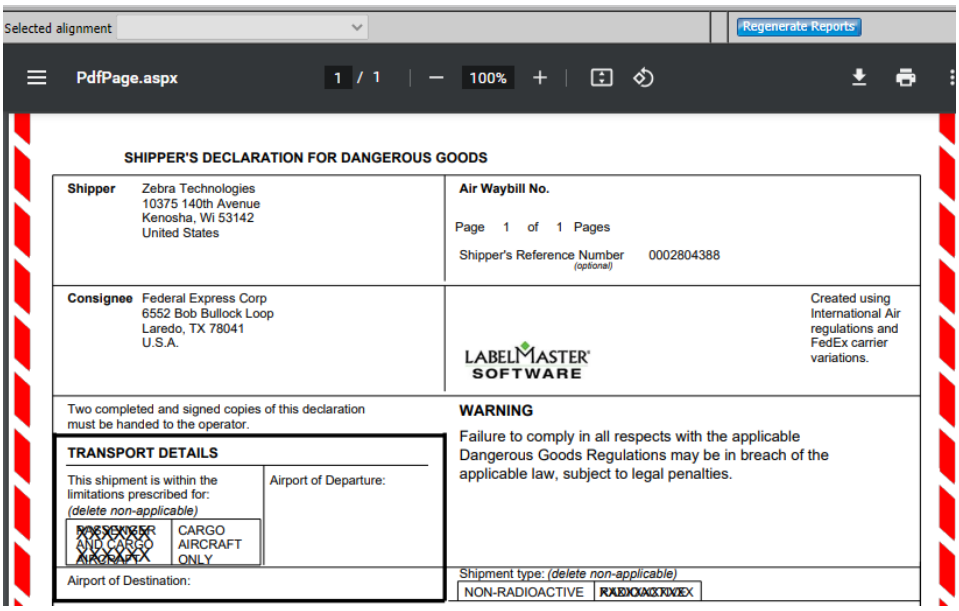


3. In the Confirm pop up, select Yes.

4. Shippers' Declarations will be displayed in PDF format. Review ALL the information to ensure it is correct.
   ✓ If correct, proceed with printing the document.

This document contains proprietary information which is the exclusive property of Zebra Technologies Corp.

The most recent version of this document is located on the ISO Library.
Verify revision number before use.



5. Click on the Print Icon; if the icon is not displayed, click on the 3 dots, then click More Options, and select Print.

6. Change the # of Copies to 4.

7. Click Print and close the PDF.

8. When the system asks if the document printed correctly, click Yes. The shipment will be moved to History, and the document will no longer be editable.

   ✓ If you need to make changes, click No to continue to edit.

9. Sign and Date the Shippers Declaration documents.

10. Place 3 copies of the Shippers Declarations in a packing envelope (*the document can be folded w/o obscuring any important information*), and do not seal it. We keep 1 for our records.

4. LABELS PLACEMENT

This document contains proprietary information which is the exclusive property of Zebra Technologies Corp.

The most recent version of this document is located on the ISO Library.
Verify revision number before use.

1. Shipping Label containing IDG from FedEx Ship Manager.

✓ Confirm the Ship Date on the Shipping label is current no past date for Express shipments.

2. Container Contents Label and LPN label

3. Z-Slip (Packing List is needed if more than 6-line items or 12 tracking #s).

4. Dangerous goods labels on 1 side of the box, no overlaps.

5. CAO WEIGHT LIMITS

BULK Lithium - Ion- UN3480

Cells > 20 Wh;

Batteries > 100 Wh

UN3480

PI 965

Section IA

IMP: RBI

Limit per package:

Pax A/C = Forbidden
CAO = 35 kg

Cells ≤ 20 Wh;
Batteries ≤100 Wh

UN3480
PI 965
Section IB
IMP: RBI

NOTE: Use "IB" if package exceeds Section II Limits or more than 1 package.
Limit per package:
Pax A/C = Forbidden
CAO = 10 kg

Lithium Ion Batteries Contained in Equipment

Cells >20 Wh;
Batteries > 100 Wh

UN3481
PI 967 Section I
IMP: RLI

Limit per package:
Pax A/C = 5 kg
CAO = 35 kg

BULK Lithium Metal- UN3090

Cells >1 g;

Batteries > 2 g

UN3090
PI 968
Section IA
IMP: RBM

Limit per package:
Pax A/C = Forbidden
CAO = 35 kg

Cells ≤ 1 g;
Batteries ≤ 2 g

UN3090
PI 968
Section IB
IMP: RBM

Note: Use "IB" if package exceeds Section II limits or more than 1 package
Limit per package:
Pax A/C = forbidden
CAO = 2.5 kg

6. LTL SHIPMENTS

For LTL shipments, we must follow the steps listed in Sections 2 and 3. But before completing the shipment, we must add the Overpack.

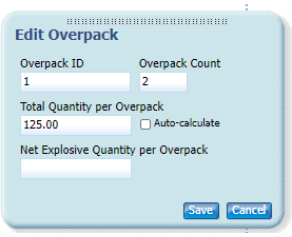
Identical Pallets:

1. Click 
2. Click on Add Overpack

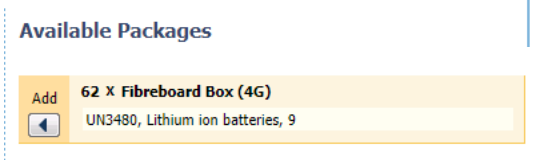
This document contains proprietary information which is the exclusive property of Zebra Technologies Corp.

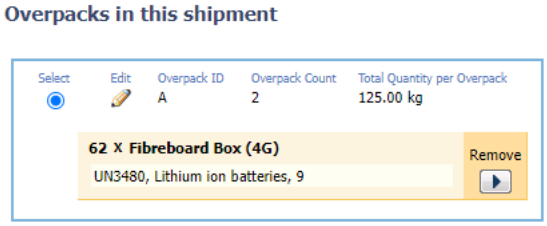
The most recent version of this document is located on the ISO Library.
Verify revision number before use.

3. Overpack ID enter A (If multiple pallets with different weights, we will use sequential numbers)
4. Overpack count is the number of Identical pallets.
5. Uncheck Auto Calculate
6. In Total per Overpack - Enter the weight for 1 of the pallets.

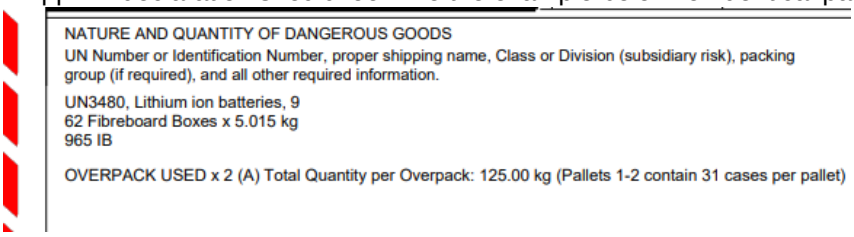


7. In the last entry box, enter how many cases are per pallet. Ex (*Pallets 1-2 contain 31 cases per pallet*)
8. Click save when done.
9. The system will display the overpack.
10. In available packages - Click Add, and the cases will be added to the Overpack.





11. Shippers' declaration should look like the example below for identical pallets.



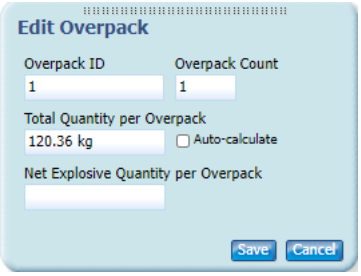
✓ When we calculate, the weights on the shippers' declarations should coincide with the shipment's net weight.

Non-Identical Pallets:

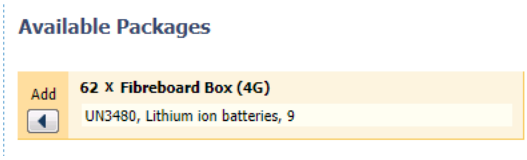
1. Click 
2. Click on Add Overpack

3. Overpack ID: enter the 1 for the first pallet and follow the sequence for the rest of the pallets.
4. Overpack count 1
5. Uncheck Auto Calculate
6. In Total per Overpack - Enter the weight for the pallet

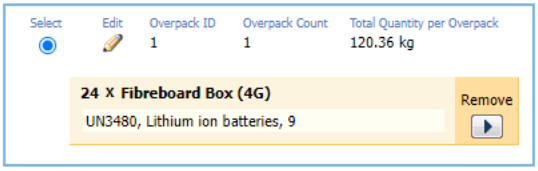
7. The system will display the Overpack.



8. In available packages - Click Add, and the cases will be added to the Overpack



9. The overpack now has the cases that are on the pallet.



Example of different pallets below.

✓ You should have an overpack per pallet.

10. Below is an example of how the shipper's declarations should look when we have different pallets.

Verify revision number before use.

NATURE AND QUANTITY OF DANGEROUS GOODS
UN Number or Identification Number, proper shipping name, Class or Division (subsidiary risk), packing group (if required), and all other required information.

UN3480, Lithium ion batteries, 9
24 Fibreboard Boxes x 5.015 kg
965 IB

OVERPACK USED (1) Total Quantity per Overpack: 120.36 kg

UN3480, Lithium ion batteries, 9
20 Fibreboard Boxes x 5.015 kg
965 IB

OVERPACK USED (2) Total Quantity per Overpack: 100.30 kg

UN3480, Lithium ion batteries, 9
18 Fibreboard Boxes x 5.015 kg
965 IB

UN3480, Lithium ion batteries, 9
1 Fibreboard Box x 1.204 kg
965 IB

OVERPACK USED (3) Total Quantity per Overpack: 91.47 kg
