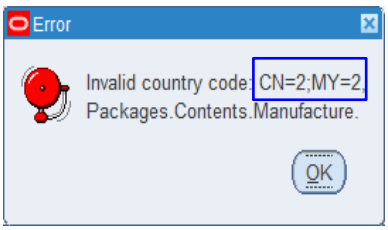
INFOSHIP CALL: MULTIPLE COO ERROR

When items with multiple Countries of Origin are picked against a single pick task, this may result in an error when doing the 'Infoship Shipment Call' – depending on the carrier:



To work around this error, the following steps need to be completed:

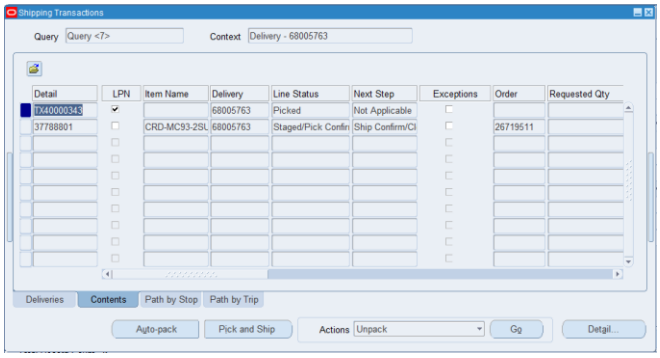
Step 1: Split the quantities per item/COO into a separate LPN using the 'WI - Outbound - LPN Split' Work Instruction

Step 2: Consolidate the LPNs using the 'WI - Outbound - LPN Consolidate' Work Instruction

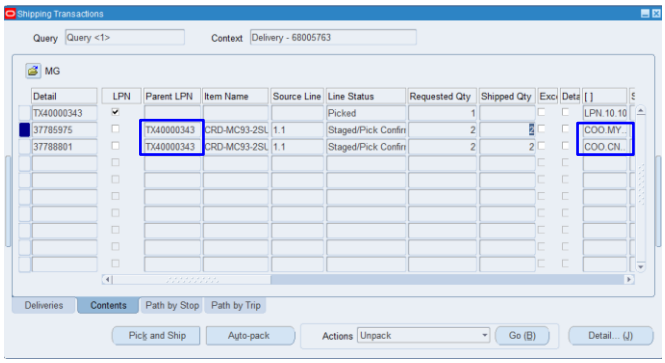
Step 3: The LPN weight will need to be added again using the 'WI - Outbound - Adding Weights and Dims' Work Instruction

These steps will ensure that the LPN contents are split into separate content lines:

Before:



After:



The Delivery is now ready for the 'Infoship Shipment Call' again.
