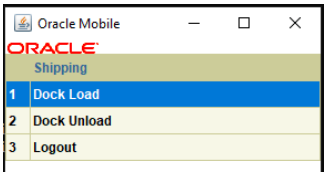
LOADING (RF LOADING)

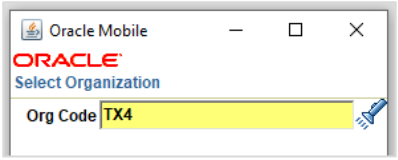
When loading pallets onto a truck for LTL/TL deliveries, every pallet must be scanned before loading it into the trailer.

The message must state, “LPN TXYYYYYYY Loaded”.

Step 1: Using the Mobile Application, navigate to ‘Shipping > ‘Dock Load



Step 2: Enter the correct Organization and press ‘Enter’ on the keypad

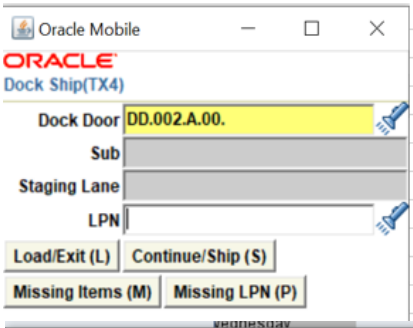


Step 3: Scan the dock door.

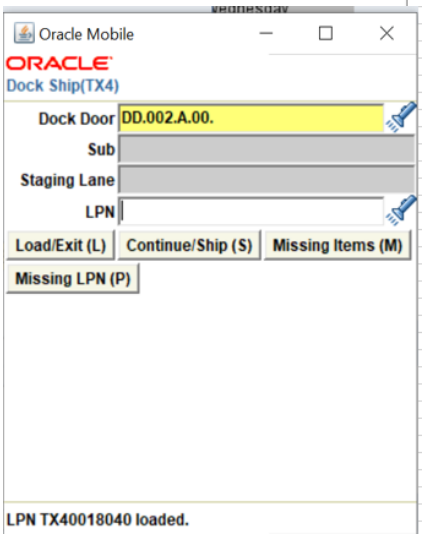
Step 4: Scan each LPN as you load, hitting the physical enter button on the gun if the scan does not auto-enter.

Note: *Do not use the “Load/Exit” button on-screen.*

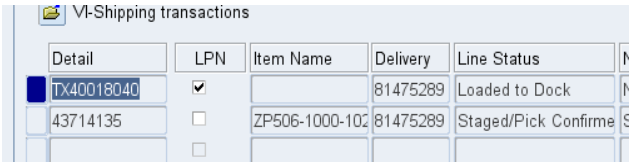
Note: *Do not pre-scan the LPNs and then load.*



Step 5: Ensure you see the loaded message at the bottom after each scan.



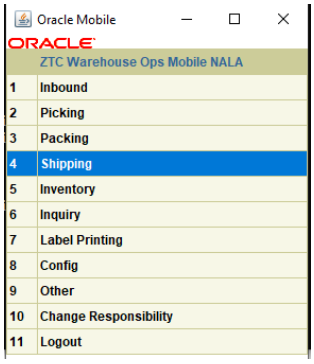
Oracle Shipping Transactions form line Status will show ‘Loaded to Dock’ if successfully scanned.

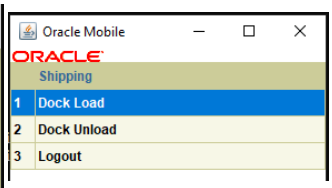


UNLOADING (RF UNLOADING)

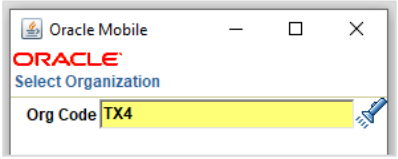
In the event an LPN needs to be unloaded, the LPN must also be scanned to unload.

Step 1: Using the Mobile Application, navigate to 'Shipping > Dock Unload.

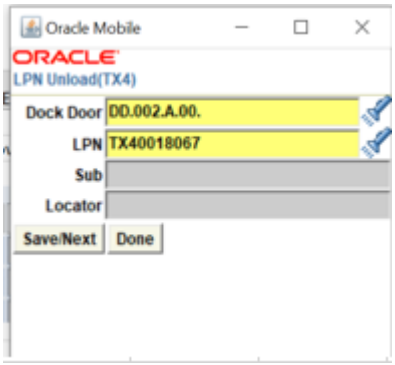




Step 2: Enter the correct Organization and press 'Enter' on the keypad.



Step 3: Scan the dock door.

Step 4: Scan each LPN as you unload, hitting the physical enter button on the gun if the scan does not auto-enter.


Note: *Do not pre-scan the LPNs and then unload.*
