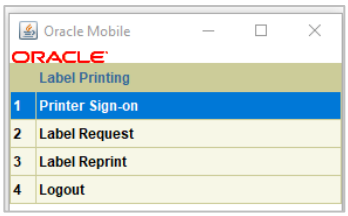
LABEL PRINTING (INVENTORY)

The following Inventory labels can be generated directly from the scangun:

Label Type	Format	Label Description	Preview
LPN	EU_2D_LPN_Contents_Summary EU_2D_LPN_Contents_Detailed	These 2D barcode labels can be used for LPNs with serialized items if the supplier labeling is not adequate or damaged	
Material	COO_Parts_Label	This item label can be used to label/identify items that have been picked. It can also be used in the Bag & Tag process. *Note: It will not print serial number details*	
Step 1: Using the Mobile Application, navigate to 'Label Printing'

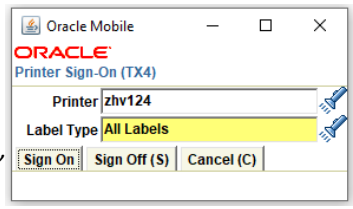


Step 2: Select option 'Printer Sign-on' to log into the printer

- Scan or enter the printer name
- Select 'All Labels' as the Label Type

Click on the 'Sign On' button

The message 'Sign on successful' will be displayed at the bottom



Please note: If you are already signed on to another printer, then use the 'Sign-Off'

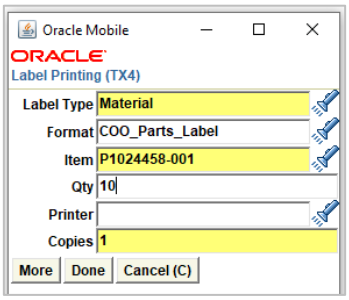
Step 3: Select option 'Label Request' to print a label

- Select the correct Label Type (using the search icon)
- Select the correct Format (using the search icon)

  Depending on the chosen Format, additional parameters may be displayed

  Note: You do not have to scan the printer name again
- Enter the number of labels ('Copies') you want to print (default = 1)

Click on 'More' to print more labels or 'Done' if you are finished printing



- The labels will be printed on the printer you have signed onto (step 2)
