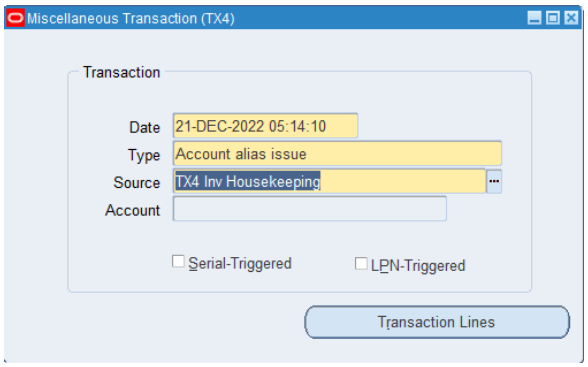
MISCELLANEOUS TRANSACTIONS (ACCOUNT ALIAS ISSUE/RECEIPT)

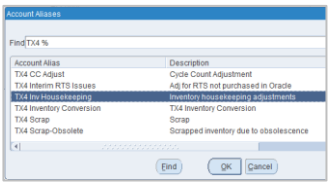
With a Miscellaneous Transaction you can do an (unplanned) issue or receipt of materials. They are often used to correct inventory records. The Miscellaneous Transactions are linked to specific General Ledger accounts.

Step 1: Using Oracle Forms, navigate to 'Inventory Transactions' -> 'Miscellaneous Transaction'



Step 2: In the 'Type' field select either the 'Account Alias Issue' or 'Account Alias Receipt' option the printer.

In the 'Source' field select the appropriate source, e.g., 'TX4 Inv Housekeeping'



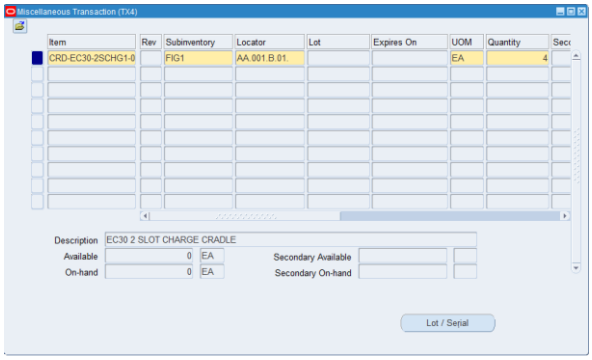
Please note:
If you need to do a transaction against a full LPN, tick the box 'LPN-Triggered'
If you want to default the inventory information from the serial number, tick the box 'Serial-Triggered'

Click on the 'Transaction Lines' button.

Step 3: The Account Alias Issue/Receipt screen will be displayed

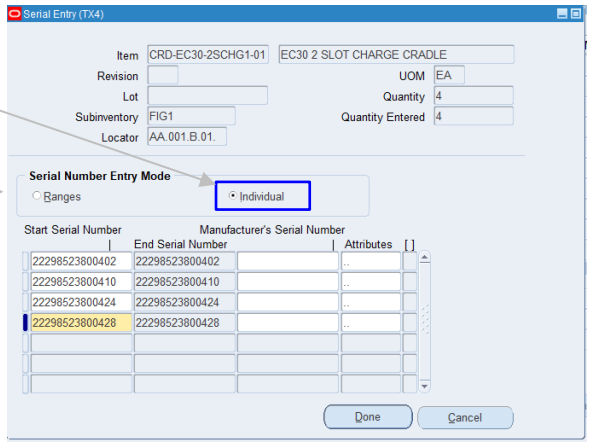
Enter the following details:

- Item
- Subinventory/Locator
- Check/confirm UOM
- Quantity



If the items are serial-controlled, then click on the 'Lot-Serial' button and enter the Serial Numbers using the Serial Number 'Individual' Entry Mode

Please note: You can use the Serial Number 'Ranges' Entry Mode if you have a set of <u>sequential</u> serial numbers that need to be entered.



Click on 'Done' when all Serial Numbers have been captured

Click on the 'Save' button in the toolbar to generate the issue/receipt

The receipt or issue will be processed, and the transaction details can be seen in 'View Material Transactions'
