Shipping Operator (Actual Shipment/ Dock Operator)
Start
Oracle pick release
Priority release?
Yes
No
(Scheduled) Daily Pick Release
Manual Pick Release
Release successful?
Yes
No
Set priority in Warehouse control board
Resolved
Discrepancy Resolution Process
Monitor progress and steer team
Set tasks to executable status
Sign in on equipment
Perform Pick Tasks
RFID label needed?
Yes
No
Generate LPN label with RFID inlay
Picking discrepancy?
No
Box/product damage
Physical move to drop zone
Kenosha Outbound Box & Material Damage Disposition Flow
Automated drop transaction execution
Automatically printed label in Oracle MWA
Pick Drop label
LTL or Parcel?
Parcel
LTL
Single LPN or multiple LPN?
Multiple
Single
Multiple LPN Parcel Process Flow
LTL Process Flow
Kenosha Outbound Box & Material Damage Disposition Flow
Box/product damage
Hold validation, escalate to lead, quarantine in the area
Yes, Hold
Items needing overpacking present?
No
Yes
Check OK?
Yes
Count Discrepancy
Picking Discrepancy Resolution Process
SKU and Qty verification
Shipset validation, escalate to lead if broken, error resolution
Yes, Shipset
Exception on report?
No
Check reported exceptions on PCR
Pull from the location indicated on PCR
System generated Pack Consolidation Report (PCR) after drop
Capture dims and weights on PCR
Apply DG and cover labels if necessary
Overpack the items
Build the carton
Packing process completed, PCR report is checked
Assign W&D to LPNs for Delivery
Non-serialized items
Multisource Country of Origin registration
Export shipment?
No
Yes
AES filing
Other Customer/ Country reqs?
Yes
No
Process Customer/ Country Specific Requirements
GTM Offline Export Shipment?
No
Yes
Add ITN Number to Delivery
Carrier Labels
Infoship process / call
Shipping Labels
Generate & apply Shipping Content labels and Z-Slip
Affix Carrier labels & Documents to shipment
Sort the packages on appropriate carrier pallet
Physical move into appropriate staging lane
Automated staging move in the system based on RFID imaging.
Physical and staging move to the dock door location
Load Truck/Trailer
Ship Confirm By Carrier from Dock Door
End
RFID Interface
RFID MotionWorks
1. RFID label is being scanned by one of ATRs
2. The ATR is detecting an LPN move within the zone
3. The interface execution for the drop transaction is running in the background.
4. Automatic drop transaction based on the zone the LPN is detected in; label request is sent to Zebra printer.
5. The ATR is detecting an LPN move within the zone
6. Staging move interface is triggered after LPN reside in the zone for X minutes
7. The ATR is detecting an LPN move within the zone
8. Staging move interface is triggered after LPN reside in the zone for X minutes

✓ **Denotes Draft WI created**

Revision	Documented Change	Author	Date
01	Original Issue	P. Eroshenko	6/6/2023
02	Added PTO Kitting OB Flow	P. Eroshenko	7/12/2023
03	Added a reference to Kenosha Outbound Box & Material Damage Disposition Flow	P. Eroshenko	7/19/2023
04	Removed the PCR generation as a step (made it a document),Added additional connector from Check OK for PTO Operator, incorporated discrepancy resolution (PTO kitting), moved the LPN merge transaction to be later in the process to follow verification (PTO Kitting), included COO update (PTO Kitting), removed Multi-Source registration from Shipping Coordinator (PTO Kitting), moved generation of shipping labels after Info-ship call (Parcel OB Flow), added weight and dims capture for Parcel shipments (PTO Kitting), added transportation scheduling (Standard OB Flow, PTO Kitting).	P. Eroshenko	7/19/2023
05	Added additional process steps for LTL process (Packer: decision node for PCR availability, Shipping Contents printing, and carton count entry, Quality: added quality assurance for pallet contents); incorporated a process flow for sealed full pallets into the OB LTL Flow; removed the Shipping Contents generation from the PIT operator and replaced it with apply Shipping Contents label; switched the pallet wrapping and dimensions capturing in order for LTL flow; added the case count entry to LTL instructions.	P. Eroshenko	1/11/2024
06	Rewrote Single LPN, Multiple LPN Parcel, and LTL processes to accommodate batch ship-confirmation and nest the process flows on a single page to reduce the navigation burden	P. Eroshenko	5/29/2024
07	Updated the shape and wording of the Picking Dicrepancy sub-process reference blocks across the document, revised and updated the structure and content of the Picking Dicrepancy Resolution Process Flow.	P. Eroshenko	11/22/2024
08	Created future state flows to display RFID interface for Single LPN Parcel, Multiple LPN Parcel and LTL processes; Added a visual for a manual portion of the Manual Pcik Release action.	P. Eroshenko	7/1/2025
