ADDING THE ITN NUMBER TO A DELIVERY

For consolidated shipments that are processed in GTM using the 'Offline shipment' method, the International Transaction Number (ITN) must be manually added to the Delivery in Oracle.

The ITN number will be generated in GTM and must be added before the Delivery can be shipped using the 'Infoship Call' option.

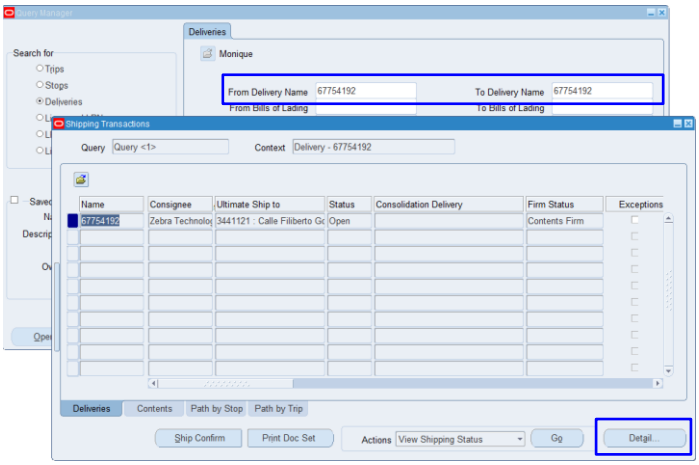
Step 1: Using the Oracle Forms, navigate to the 'Shipping Transactions' Form

Step 2: Select the 'Deliveries' radio button

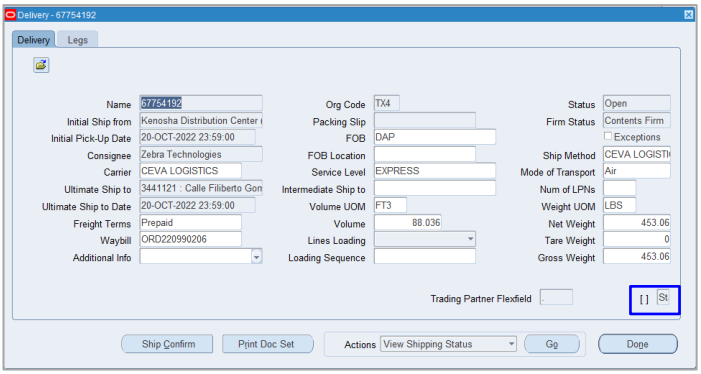
Enter the Delivery number in the 'From Delivery Name' and 'To Delivery Name' fields

Click on the 'Find' button

Step 3: Select the 'Detail' button

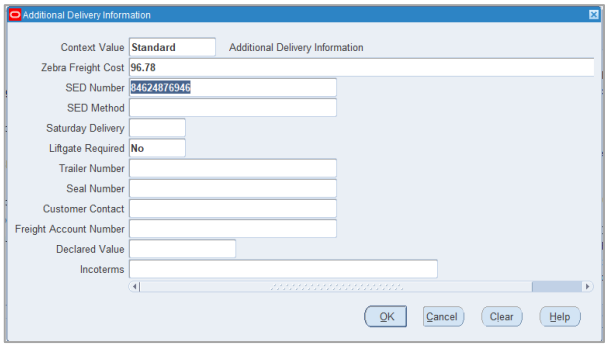


Step 4: Click on the so-called 'DFF flexfield' in the bottom right-hand corner



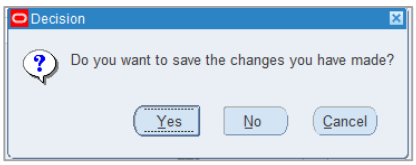
Step 5: Enter the ITN number into the 'SED Number' field

Click on the 'OK' button to exit the 'DFF' field twice



Click on the 'Done' button

Choose 'Yes' to save the changes



- The ITN number is recorded against the Delivery
