GENERATE HTS REPORT

HTS stands for Harmonized Tariff Schedule, a classification system used in the US to help determine customs duties to be paid. An HTS report is needed for any LTL shipment over a value of $2,500.

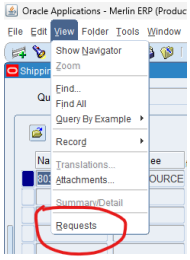
For Parcel, only if the Freight Forwarded requests the report.

Please note: If you are using Infoship for the first time you need to set up the Infoship Printer first (instructions at the bottom)

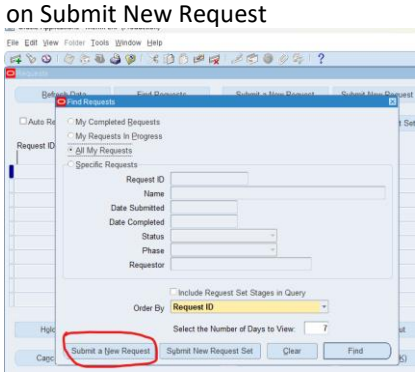
Step 1: Using Oracle Forms, navigate to Outbound then Shipping Transactions

Step 2: Click on the View menu.

- Then Requests

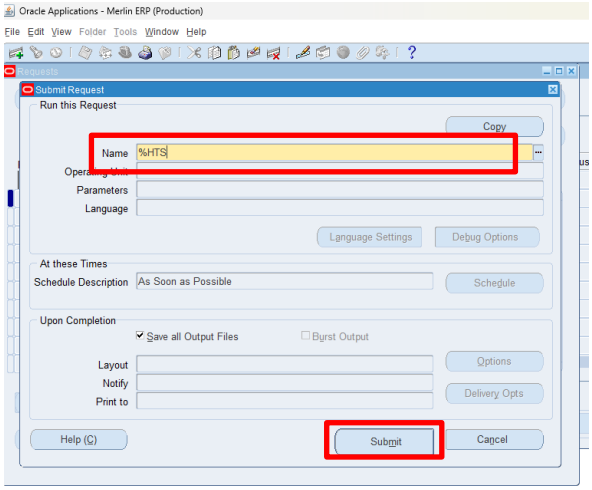


Step 3: Click on Submit New Request



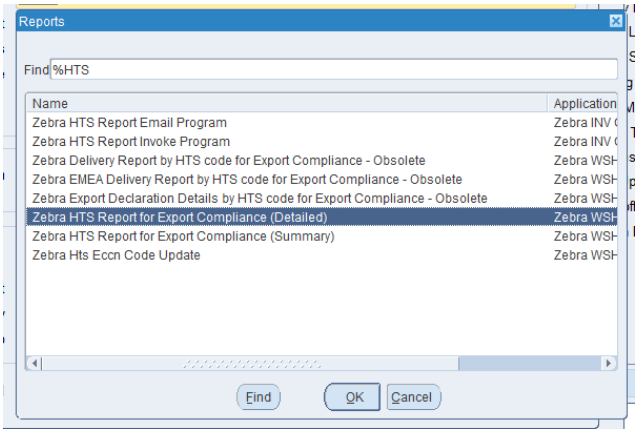
Step 4: To Run the Request, enter %HTS in the Field name.

- Click Submit

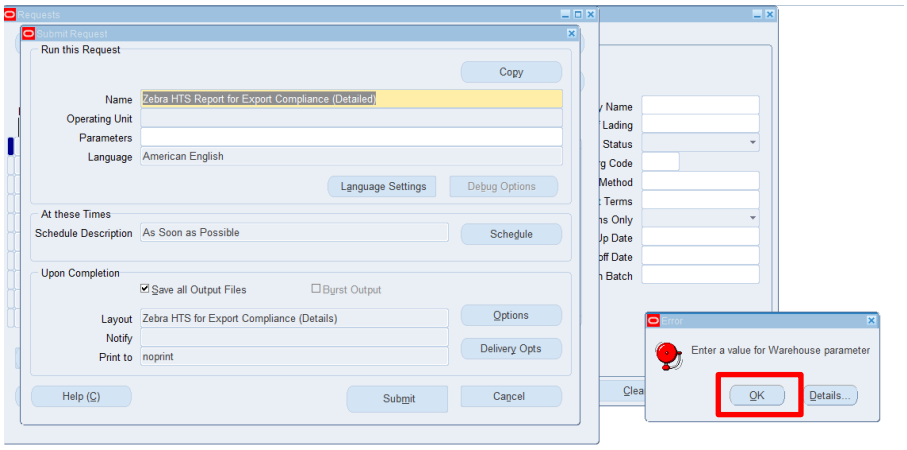


Step 5: Select the report listed below:

- *Zebra Delivery Report by HTS code for Export Compliance (Detailed)*
- Click Ok

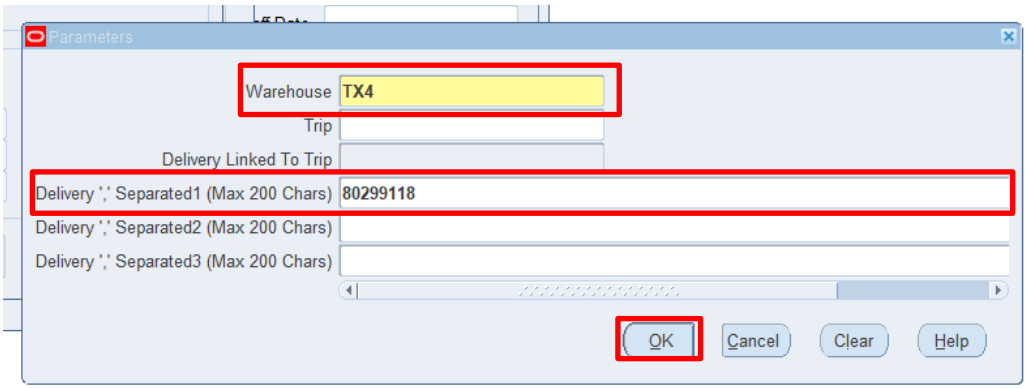


Step 6: In the Error Pop-up for Warehouse Parameter, click OK.



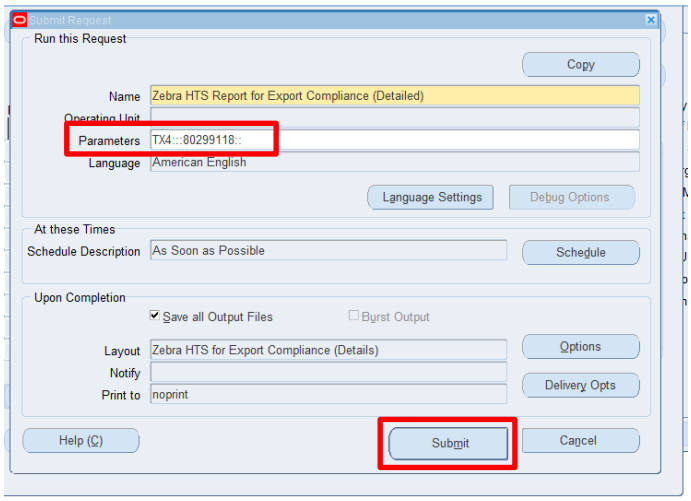
Step 7: In the Parameters window, enter the order org and the Delivery #

- In the Warehouse field, enter TX4 or TX5, hit the tab, and the Delivery Name 1 field enables.
- In the "Delivery" field enter the delivery number.
  - If multiple DNs, please make sure to separate them with a "," a max of 200 characters.
- Click OK

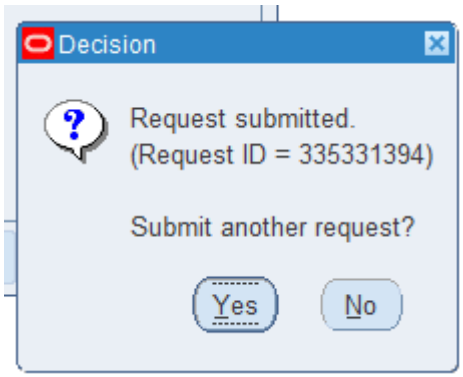


Step 8: In the Request screen, you should see the Org and the delivery number in the Parameters field.

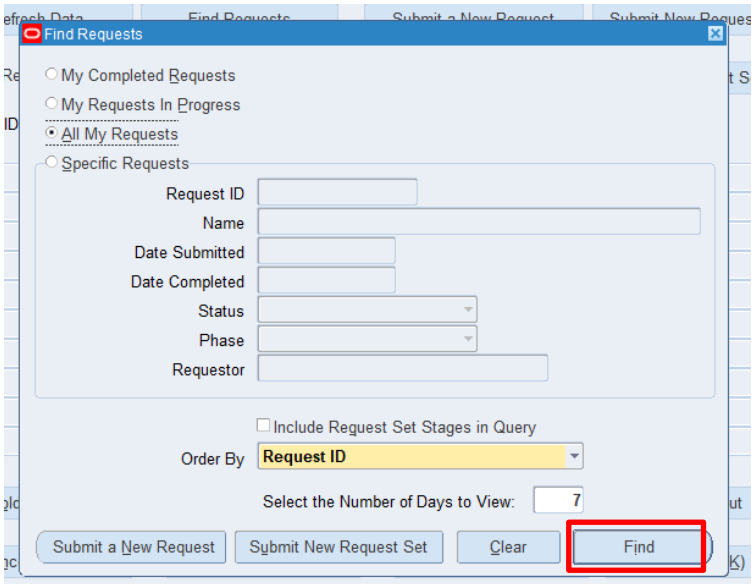
- If you do, Click Submit.
- If you do not, follow steps 1-7 again.



Step 9: In the Decision pop-up box, make the appropriate selection.

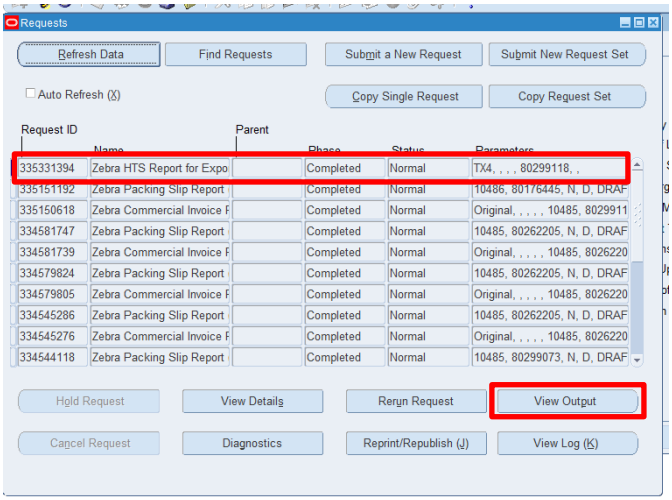


Step 10: To view or print your report. In the Find Requests screen Click on Find.



Step 11: Locate the report you requested; the parameters field will display the delivery.

- Put the cursor on the delivery and click on View Output.

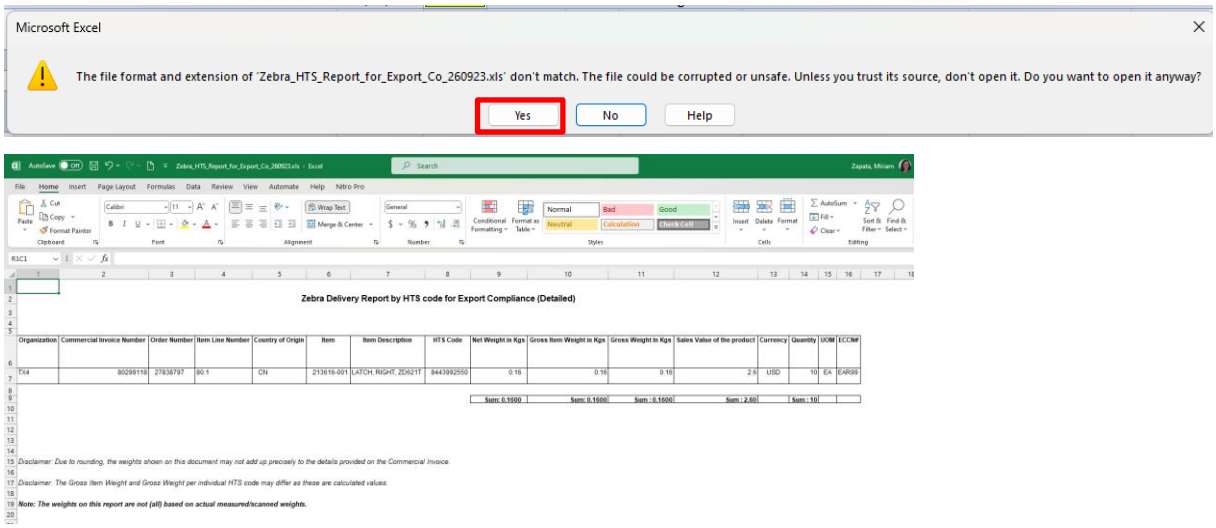


Step 12: The Report will be downloaded in an Excel workbook format.

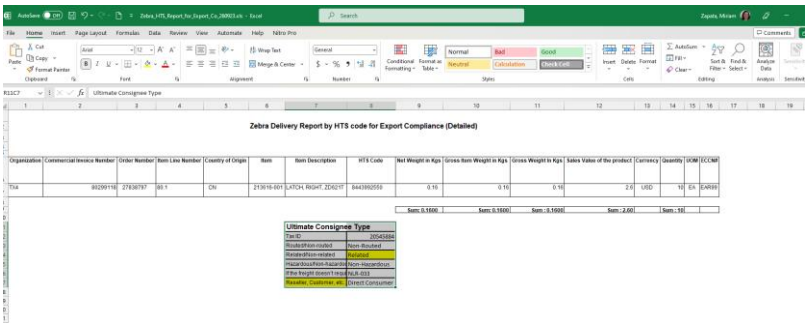
- Click on the Report to open it.

Step 13: In the Microsoft Excel error message, click Yes.

- The report will be displayed.



Step 14: Add the AES Ultimate Consignee Type table, then save your file as .XLSX format to complete the file.



- File must be named using tracking number followed by delivery number.
  - Ex. DFW0266177 - 74039039

Print and/or Save the report as needed.

Infoship Printer set up:
Go to 'Edit' -> 'Preferences' -> 'Profiles'.
Query Profile Name 'ZBR_INFOSHIP_PRINTER_OVERRIDE' and enter the label printer name in the 'User Value' field
