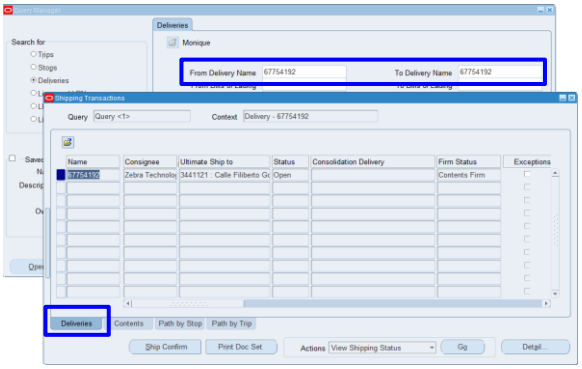
LTL INFOSHIP CALL

Once the shipment is ready to be shipped the 'Infoship Shipment Call' can be done. The Infoship Call ensures that the correct carrier is assigned to the Delivery, the waybill number is generated, and the carrier labels are printed.

Please note: If you are using Infoship for the first time you need to set up the Infoship Printer first (instructions at the bottom)

Step 1: Using Oracle Forms, navigate to Outbound then

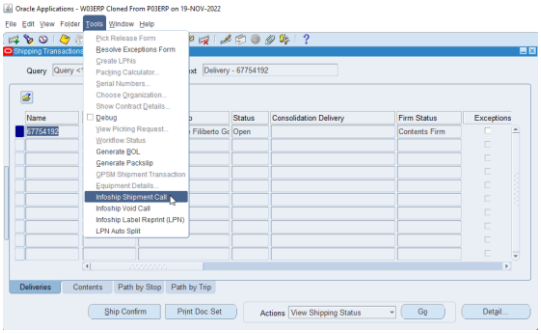
Shipping Transactions



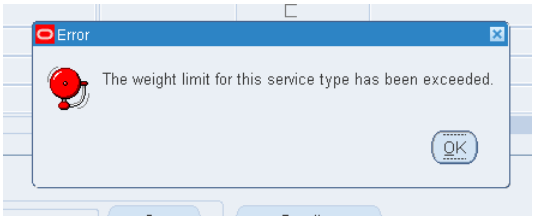
Step 2: Select the Deliveries radio button.

Enter the Delivery number in the
From and To Delivery Name fields

Step 3: Ensure you are on the Deliveries Tab
Go to Tools then Infoship Shipment Call

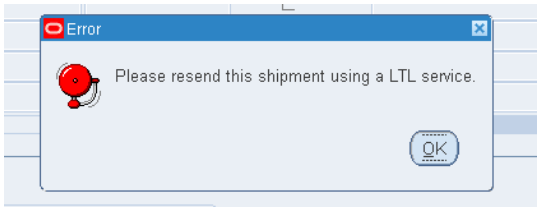


Step 4: If the system displays a weight limit error,
bring the delivery to the LTL area.
The routing needs to be changed (follow steps 6 - 7)

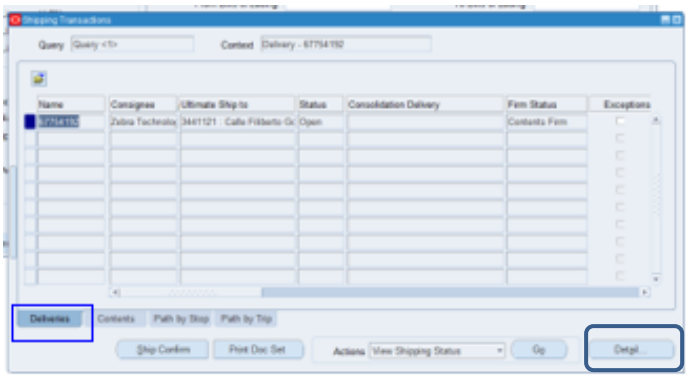


Step 5: If you get this error message continue processing the order.

Click OK on the pop message

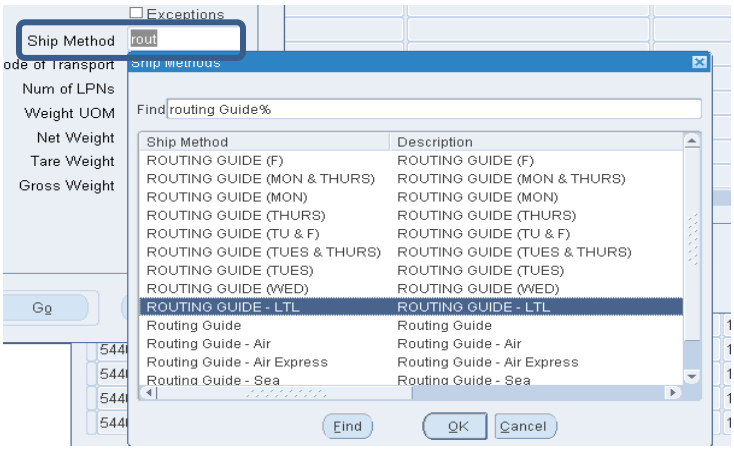


Step 6: In the Deliveries tab, click on the Details button.



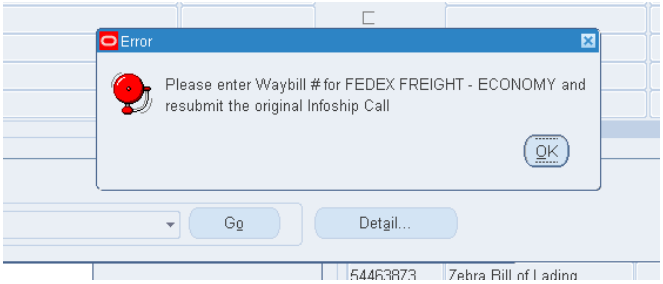
Step 7: Delete the current ship method, type in "Rout, and press the tab key, it will display the Routing Guide.

Select Routing Guide – LTL



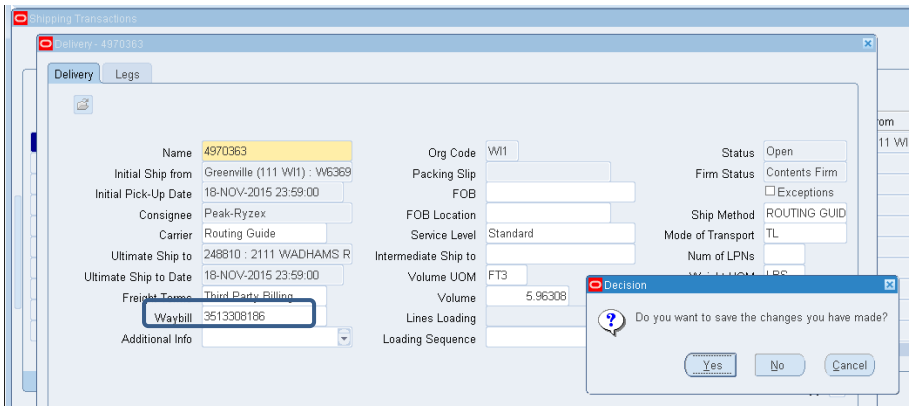
Step 8: Click Ok and Save

Step 9: Go to Tools and Info Shipment Call again.
The system will display the carrier the delivery will ship with
Click Ok on the pop-up.



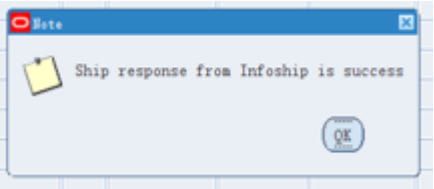
Step 10: Click on the Details tab and Scan in a PRO #

Click Yes to Save the changes.



****Do NOT change the carrier under the ship method, leave it as is.**

Step 11: Go to Tools and Info Shipment Call **again, a successful response pop-up will display.**



Print Documents

**To verify that the routing guide was run correctly after printing the BOL double-check the freight terms.

**The freight terms for a routing guide will NEVER be "prepay & add".

Please check with the Logistics/Transportation Team in case you see an error message for the Infoship Call that you cannot resolve yourself.

The Delivery is now ready to be shipped and to be 'Ship Confirmed' in Oracle.

Infoship Printer set up:
Go to 'Edit' -> 'Preferences' -> 'Profiles'.
Query Profile Name 'ZBR_INFOSHIP_PRINTER_OVERRIDE' and enter the label printer name in the 'User Value' field
