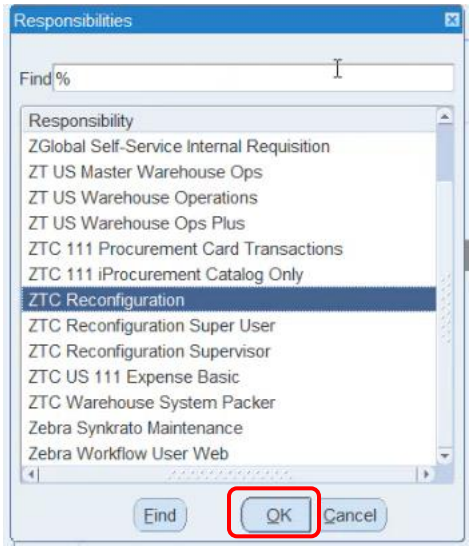
1. OVERVIEW

These work instructions outline the process for printing labels using the Oracle ERP system.

2. PRINT PART LABELS USING ORACLE

1. Log into the Oracle system.
2. Proceed to Responsibility ZTC Reconfiguration and click OK.



3. Hover over the View Menu and select Requests.

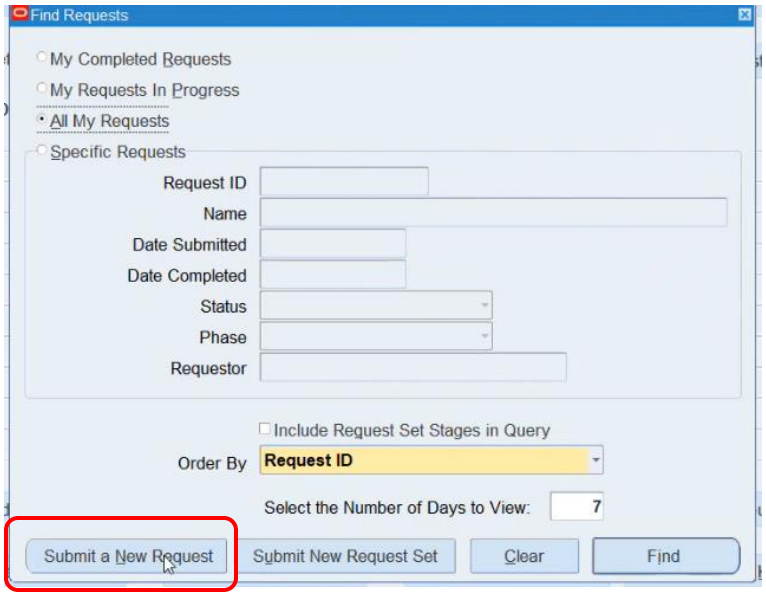
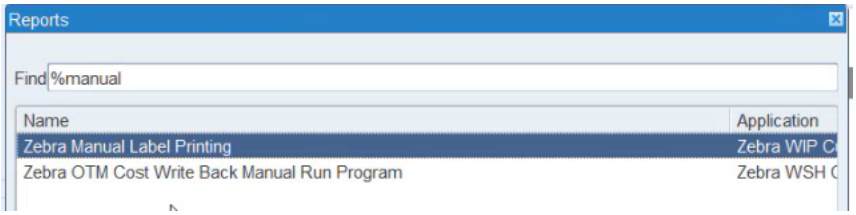
Verify revision number before use.

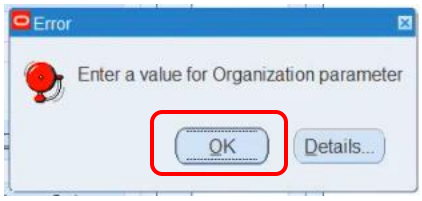
4. Select Submit a new request.



5. In the name field, enter **%manual** and hit enter. It will populate the reports associated with the wording you enter.



6. Select **Zebra Manual Label Printing**.
7. In the Error screen, click OK to enter the parameters.



8. In the Parameters screen, enter the Org (TX4). Once you enter the org, the mandatory fields will be in yellow, and the optional fields will be in white.

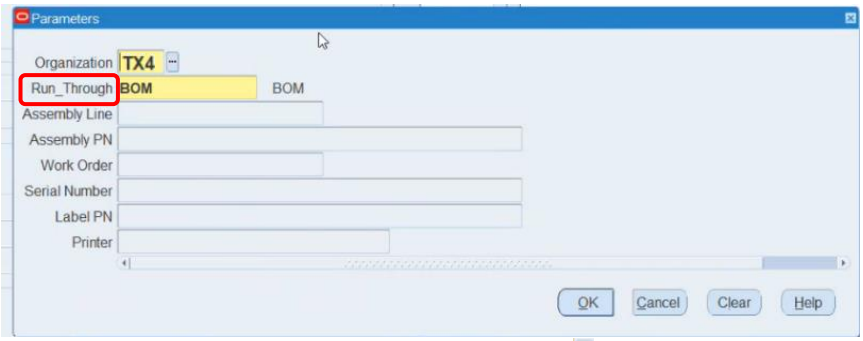
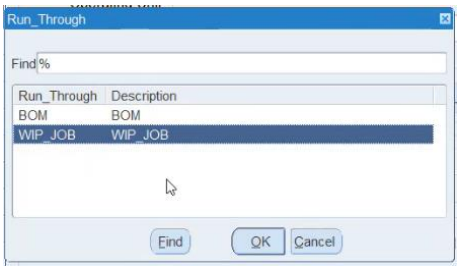
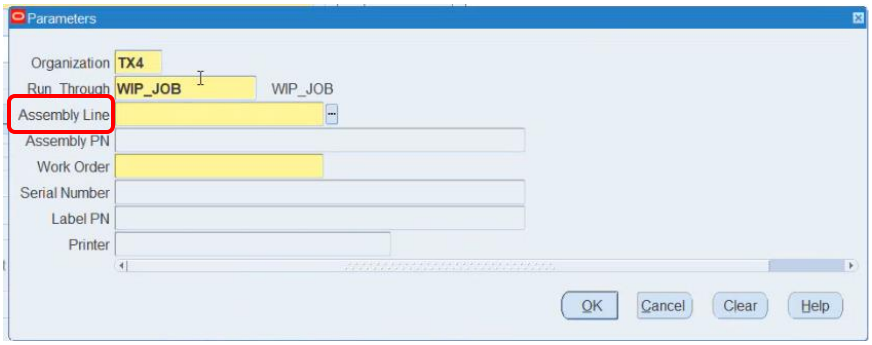
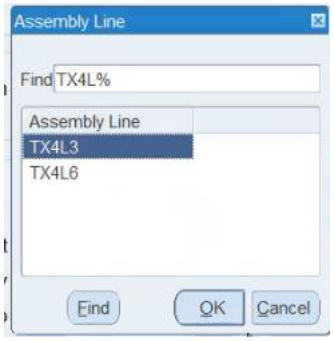
9. In the Run-through field, select the three dots to display the options. Select **WIP-JOB**.





10. In the Assembly Line field, click on the three dots to display the options. Select the appropriate line from the list.

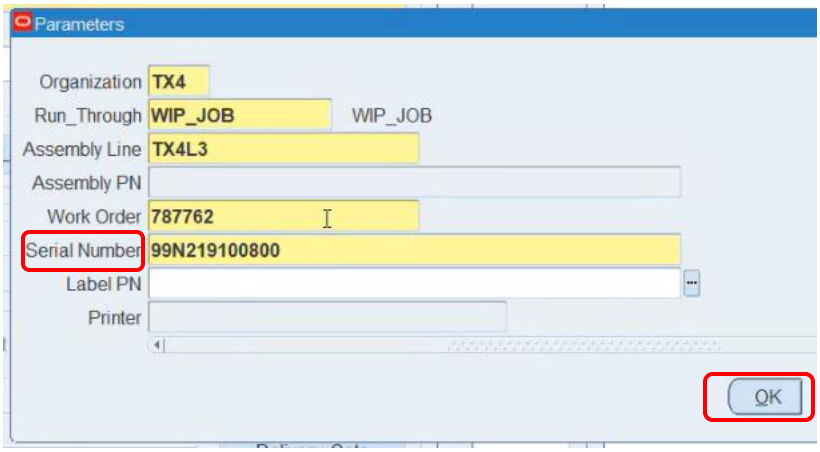




11. In the Work Order field, enter the work order number.

12. Hit Tab, and the Serial Number field will display and become mandatory if the material is serialized. Scan the serial number from the traveler.

✓ Do not click on the three dots for options; you must scan the traveler's or printer's serial number.



13. Click OK

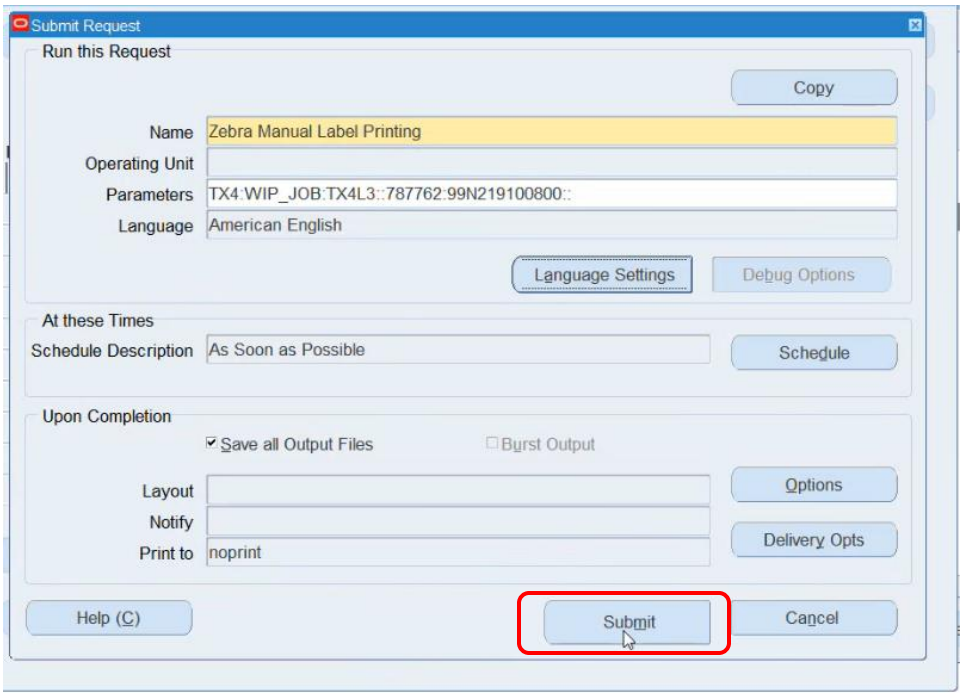
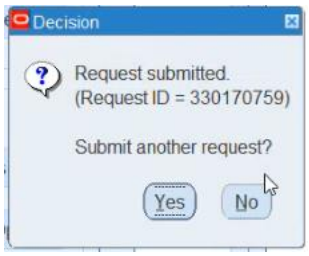
14. Click Submit

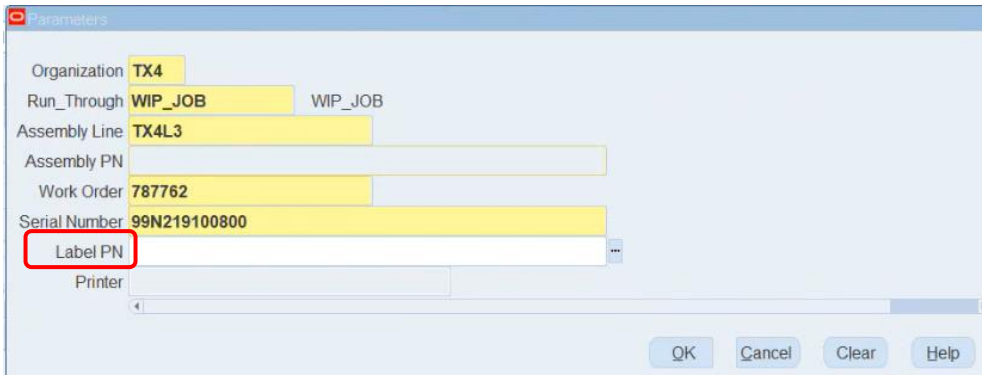


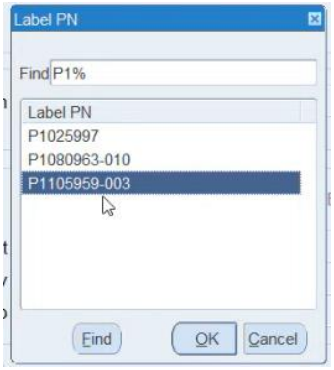
✓ It will trigger printing for all the labels on the work order.



✓ Make the appropriate selection.

15. (Optional) If you need to print only one of the Labels, in the Label PN field, click on the three dots for options and select the Label Part Number you need.





✓ If you scan or enter the wrong part number, the system automatically displays the Label part numbers available on the work order. The below example will not print.

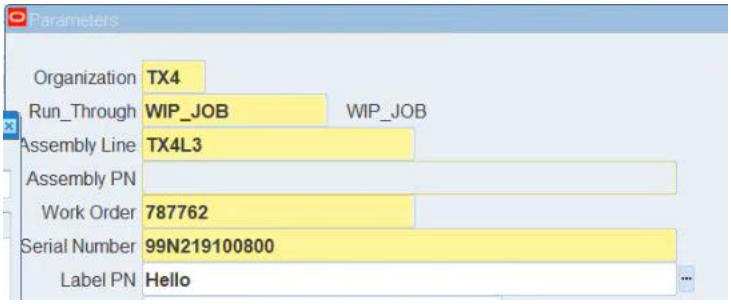
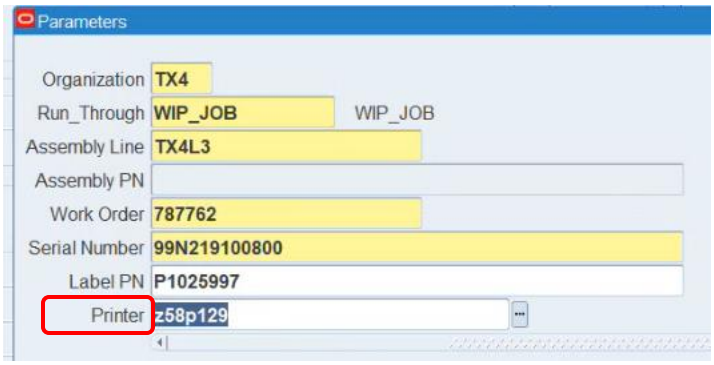
Verify revision number before use.



16. (Optional) If you attempt to print only one of the part labels on the work order, the printer field will be enabled, allowing you to enter the printer of your choice.



✓ The printer's name is the alphanumeric label on the printer in uppercase, which must be entered in lowercase.

✓ The printer's name you enter in the parameters screen will override the selected assembly line.

3. Reprint Labels

If you must reprint a Label, you will follow the steps listed above.

Steps 3-14 to reprint all the part labels on the work order.

Steps 15 to reprint one of the labels on the work order.

Step 16 is optional.

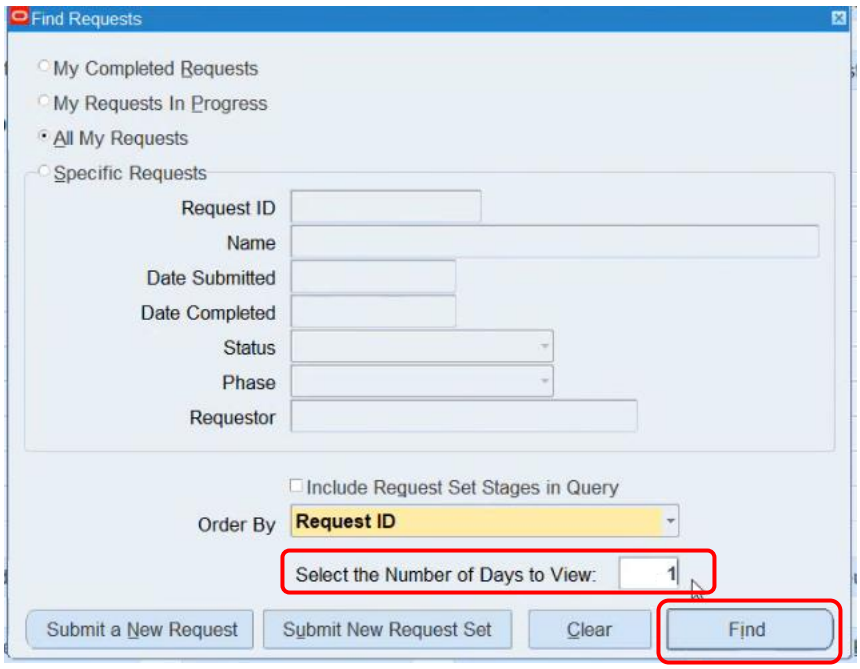
4. View Requests

In the Find Requests screen, you can view the requests you submitted.

1. Change the number of days to view to 1



2. Click Find.

3. If the Status states Normal, the labels should have been printed.

4. If the Status states Warning, the labels were previously printed; therefore, it is a reprint.

- ✓ The warning is a sign of caution and indicates at least 1 label is a reprint. It does not prevent labels from printing. It's okay to reprint labels if needed.
- ✓ Verify the Label and the Serial number on the labels is correct.
