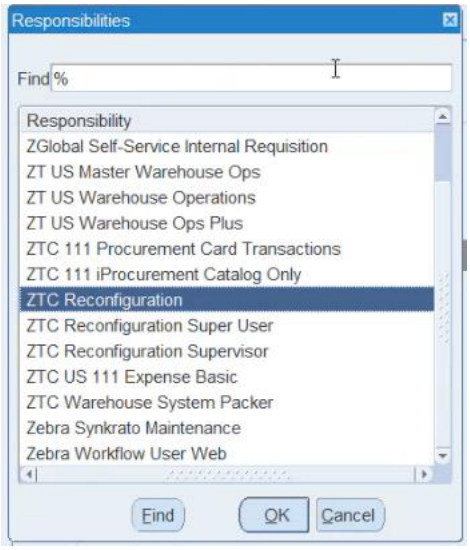
1. OVERVIEW

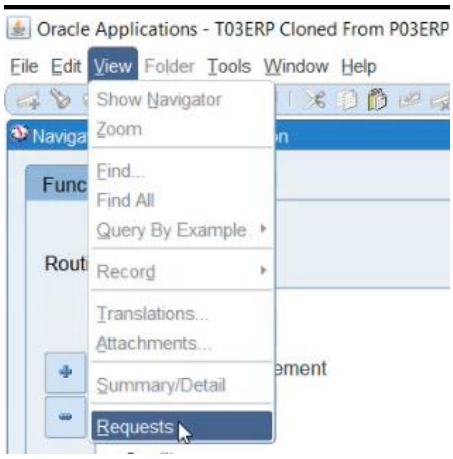
These work instructions outline generating a report with printer setup details and communicating to Oracle the assembly line where the work order will be processed.

2. PRINTER SET UP

1. Log into the Oracle system.
2. Proceed to Responsibility ZTC Reconfiguration and click OK.



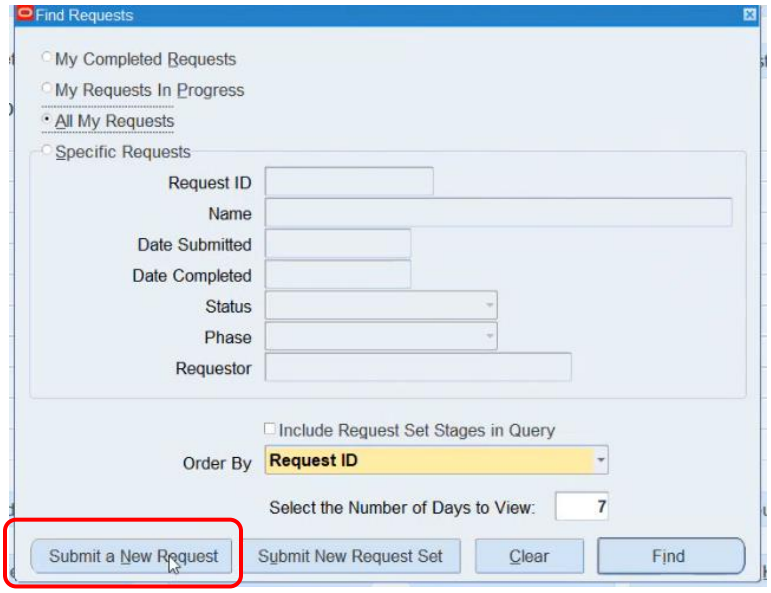
3. Hover over the View Menu and select Requests.



This document contains proprietary information which is the exclusive property of Zebra Technologies Corp.

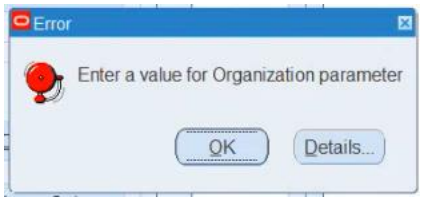
The most recent version of this document is located on the ISO Library.
Verify revision number before use.

4. Select Submit a new request.

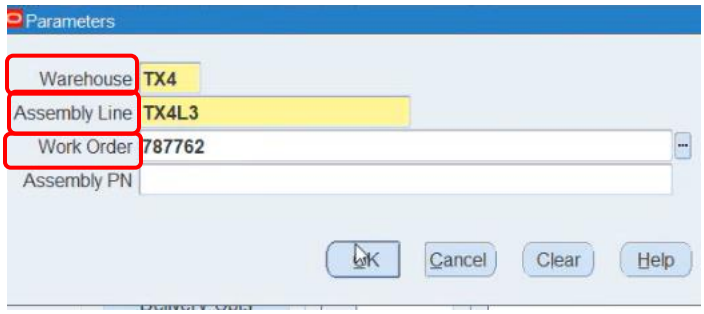


5. In the name field, enter **%media** and hit enter. It will populate the reports associated with the wording you enter.

6. Select **Zebra WIP Job Media/Printer Report**.
7. In the Error screen, click OK to enter the parameters.



8. In the Parameters screen, enter the warehouse TX4, Assembly Line, and Work Order.



✓ The Assembly Part Number can be entered instead of the Work Order, but the final report will not display the Work Order, nor will an assembly line be communicated to Oracle for the work order behind the scenes.

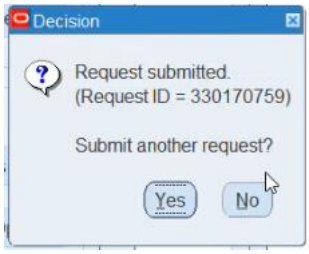
The most recent version of this document is located on the ISO Library.
Verify revision number before use.

9. Click OK, then submit.

✓ It will trigger the report.

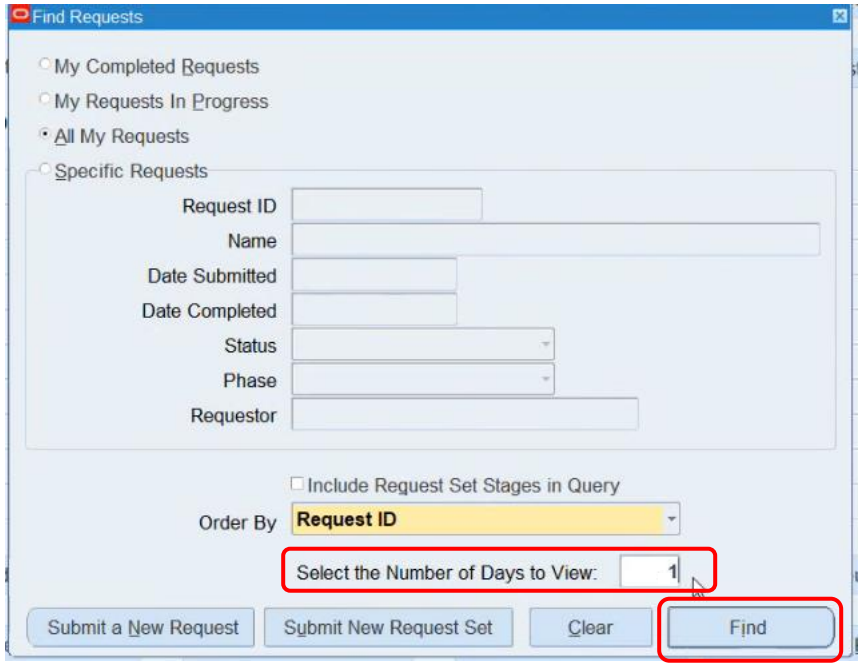


✓ Please make the applicable selection; No, it will bring you to the View Requests screen. Yes, it will remain in the parameters screen.

3. View Requests

In the Find Requests screen, you can view the requests you submitted.

1. Change the number of days to view to 1
2. Click Find.



3. The Status should read Normal to view the report.

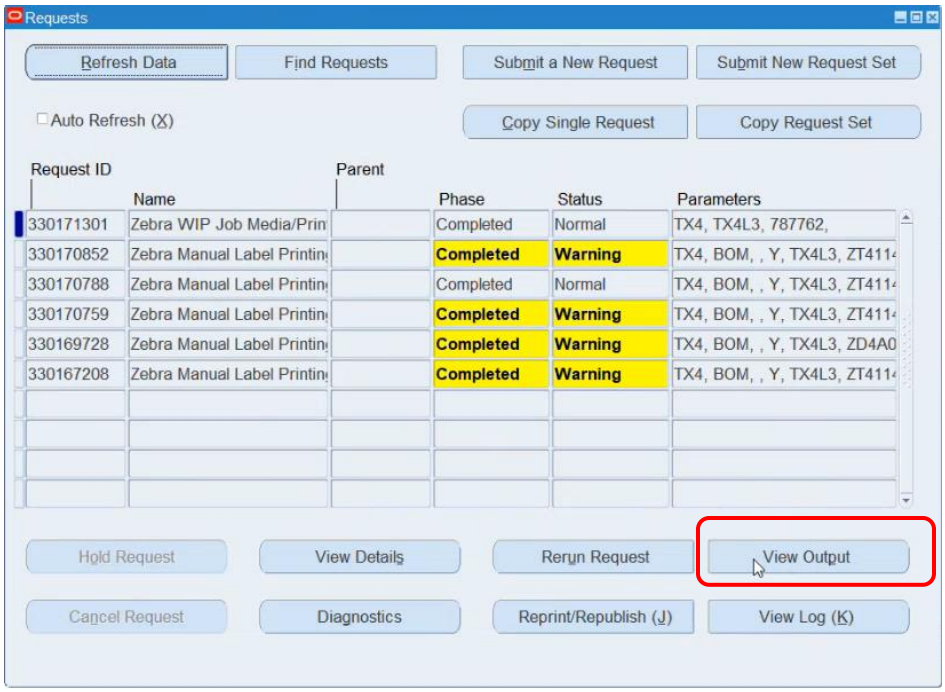
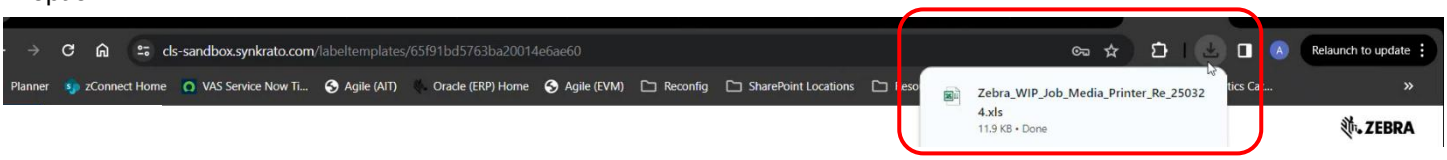
Verify revision number before use.

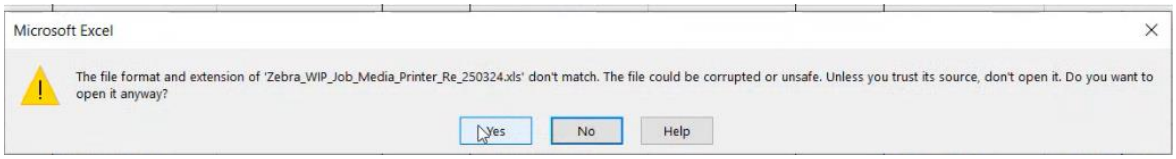
4. Click on View Output to view the Report.



5. It will download an Excel document. Click on it to Open. If it does not display automatically, go to the Downloads option.



6. Click Yes on the File format extension message.



7. Zebra Synkrato Label Printer Information Report will display.

✓ The report will show the parameters we entered.

Zebra Synkrato Label Printer Information Report
