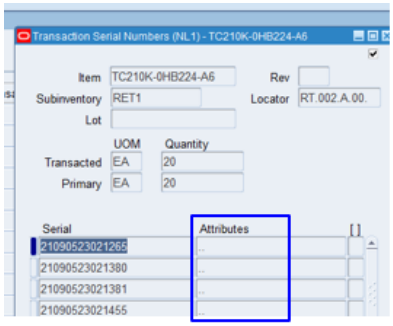
UPDATE SERIAL NUMBER COO AFTER WIP COMPLETIONS

As WIP Assembly Completions have been done onto a LPN, it may occasionally happen that the Country of Origin is missing for the Serial Numbers on that LPN.

The Team is usually aware of this issue when visually checking the LPN Content label (or via a check in Oracle).

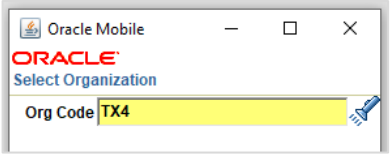


Rather than manually updating the Country of Origin for each Serial Number separately, this can be done using a separate option on the scan-gun.

Please note: The Overpack LPNs must be dropped first before the update process can be done.

Step 1: Sign on to the Oracle Mobile Application
Select Responsibility 'ZTC Reconfiguration Mobile Apps'
Navigate to 'Update SN COO by LPN'

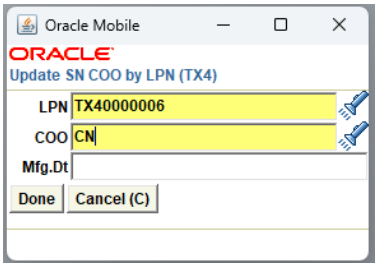
Step 2: Enter the correct Organization and press 'Enter' on the keypad



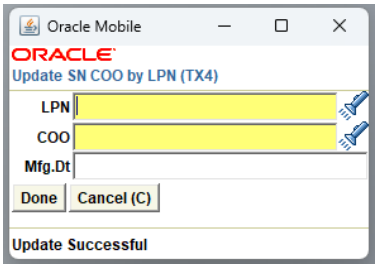
Step 3: In the 'LPN' field scan the LPN for which the Serial Numbers need to be updated
In the 'COO' field scan or enter the correct Country of Origin Code

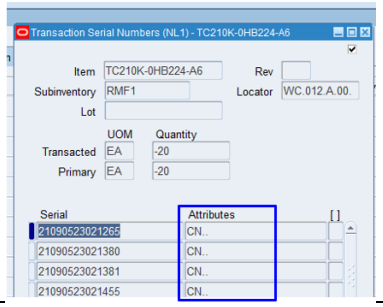
The Manufacturing Date ('Mfg.Dt') is optional

Select the 'Done' button complete the update



An 'Update Successful' message will be displayed at the bottom of the screen



The Country of Origin is now updated for the Serial Numbers


A new 'LPN Content Label' (EU_2D_LPN_Contents_Detailed) must be printed to replace any LPN label without the Country of Origin
